STRENGTH TRAINING WORKOUT FOR OLDER ADULTS

Geri-Fit® is an evidence based health promotion program for older adults. During this 45-minute strength training class, you'll improve balance, flexibility and strength by performing exercises using dumbbell weights from 2 to 8-pounds. One-on-one instruction is provided in the group setting by a certified instructor and each person is encouraged to work out at his/her own pace. Most of the exercises will be performed seated in chairs and there is no floor work, aerobics, dancing or choreography to learn. Dumbbells and stretch bands are provided.
