**Executive Summary**

The community health assessment is conducted every four years and the last assessment was conducted in 2012. The Community Health Assessment process is designed to allow us to gather information from our community members (this is primary data) to gauge the health of the county, while comparing this data with health statistics (health statistics are known as secondary data).

The Columbus County Health Department in collaboration with a Health Assessment Task Force comprised of some of Healthy Columbus’s members (formerly the Columbus County Healthy Carolinians task force) as well as residents of the county, met five times (however, individual meetings are not counted in this total). The Columbus County Health Assessment Task Force approved the survey questions that were asked of residents in the spring of 2015, and also the focus group questions used in two opposite areas of the county; Chadbourn and Bolton. An additional joint focus group was held to ask Columbus County Board of Health Members and Columbus County Board of Commissioner Members the same questions as the focus groups, however, they were not asked about how they felt about the health department’s hours of operation or how to improve services, since the task force felt that these questions were better suited for Health Department consumers and the general public.

**Data Collection and Process of Data Collection**

We made every effort to ensure that as many community members as possible took part in the survey; we had both paper and pen surveys and Survey Monkey online surveys, and focus groups. Task Force members agreed to distribute surveys to organizations and residents within their own communities, thus allowing us to create opportunities to glean responses collected that reflect those of the entire county. We also (as we did in the 2012 Community Health Assessment) determined the
areas of the county with the largest populations, and recognized that we needed to make a concerted
effort to collect 5% of surveys distributed from these towns (Whiteville, Tabor City, Chadbourn) as
well as smaller towns (Brunswick, Bolton, Delco). The number of surveys collected from each town
was set by Task Force members aiming to distribute the number of surveys in each town equal to
10% of the town’s population, with a 5% return rate. Focus groups were “advertised” in areas by
residents from those communities and Task Force members were asked to recruit individuals to
participate as well.

Community Responses and Findings

The community responded that the lack of access to health care, the ability to pay for healthcare
services, chronic diseases (heart disease, stroke, cancer, and diabetes), obesity, and substance abuse
are issues that will be needed and addressed in near future.

Health Priorities/ Concerns

The Columbus County Health Assessment Task Force and Healthy Columbus members will begin to
look at our residents’ concerns, and we will focus on chronic disease prevention, obesity, and
substance abuse prevention for the next four years. We felt that we had the capacity to address
these issues as a group, due to the current undertakings of community agencies and organizations to
address these health topics. Furthermore, our efforts to address chronic diseases and obesity will be
a continuation of efforts that began in 2012. Action plans for the aforementioned health concerns
will be developed in the spring and summer of 2016.

Below are the important 2015 Community Health Assessment information and findings:

- In the 2015 Community Health Assessment, we found that the biggest health issues or
concerns are: chronic diseases (cancer, diabetes, heart disease, stroke), followed closely by
substance abuse and obesity. Chronic diseases and obesity do continue to contribute to our
county’s leading causes of death; cardiovascular disease, some types of cancer, and stroke.
Substance abuse, although not a leading cause of death in itself, is directly tied to motor vehicle deaths and unintentional injuries. These are the 3 areas that we will develop action plans for to address in the next four years. Our community identified these issues as problems and the data concurs that these issues are the biggest health issues in the county. As we address these issues, we will be working to achieve the following North Carolina 2020 goals (North Carolina Department of Health and Human Services): Chronic Disease: Increase the percentage of adults getting the recommended amount of physical activity; Increase the percentage of adults who report they consume fruits and vegetables five or more times per day; reduce the cardiovascular disease mortality; Increase the percentage of adults who are neither overweight nor obese rate (per 100,000 population); Decrease the percentage of adults with diabetes. The aforementioned will address both chronic diseases and obesity. Substance Abuse: Reduce the percentage of traffic crashes that are alcohol-related.

- Chronic Diseases are still the number one concern of residents (this was number one in the 2012 Columbus County Health Assessment) and there has been substantial emphasis on this topic with our strong allies. Efforts include programming and implementation of chronic disease prevention efforts, including Stanford University’s Chronic Disease Self-Management Program, Stanford University’s Diabetes Self-Management Program, and the Centers for Disease Control and Prevention’s Diabetes Prevention Program. These efforts have remained ongoing since 2012.

- Obesity was a close second to substance abuse in the 2015 Community Health Assessment, and substance abuse has remained the second leading concern of residents since the 2012 Columbus County Community Health Assessment. Because obesity is directly tied most of the chronic conditions that our community members are concerned about, we will continue to deliver Stanford’s chronic disease and diabetes self-management classes (which address weight management, nutrition, physical activity), and continue to provide outreach and education on obesity.

- Substance Abuse was the third concern of the communities. Within the past two years, substance abuse has been and continues to be addressed through multiple agency efforts, and by grant funding provided by Wake Forest University and Project Lazarus. We are already working with healthcare organizations to focus on overprescribing and we are working to provide additional support to the town of Chadbourn to implement community watch groups to decrease drug trafficking. In addition, we will address the number of alcohol related fatalities by coordinating efforts with local law enforcement.

- As part of the Wake Forest University’s grant process, there was a Substance Abuse Needs Assessment conducted in fall of 2014 and the spring of 2015, through the use of Survey Monkey, and by focus groups conducted in the county. We have included this information as an appendix to the 2016 Community Health Assessment, since this topic continues to be of concern.

- Our county is described as persistently poor by the United States Department of Agriculture (USDA) as 25% of the county’s population is below the federal poverty levels, compared to 17.5% of North Carolina as a whole.
The USDA has identified food deserts in our county (areas where there is limited access to fruits and vegetables), and has recognized that 20% of the county’s population struggles to feed themselves and their families on a daily basis (USDA, 2015).

County Health Rankings data from the Robert Woods Johnson Foundation and University of Wisconsin has ranked Columbus County 100 (last) in the state for health outcomes for the past six years in a row (2009-2015).

There is still a lack of physical activity, eating healthier foods, and smoking among adults as reported in the 2015 Behavioral Risk Factor Surveillance Survey (BRFSS). These three health behaviors are self-reported among Columbus residents and negatively impact the health of residents.

Focus group participants voiced that the economy is their biggest concern and they feel that the lack of economic opportunities (including employment) is one of the main reasons why our county continues to be ranked last in the state for health.

The leading causes of death in order for Columbus County are: heart disease, cancer, stroke, unintentional injuries, Alzheimer’s disease, chronic lower respiratory diseases, nephritis, motor vehicle injuries, diabetes, and assault. Assault and Alzheimer’s were not on the list for leading causes of death in 2012.

We hope that residents will find the information contained in this document as a resource, and as a tool for change in our county. Furthermore, we are grateful to all residents who took their time to participate in this process.

**Future Plans**

**Community Health Assessment (CHA) Document for Columbus County will be:**

- Submitted to the NC Division of Public Health – March 2016
- Presented to Columbus County Board of Health, Board of Commissioners, and press – April-May 2016
- Disseminated to the local community – April-May 2016

**Community Health Action Plans for Columbus County will be:**

- Developed by the Assessment Team – April 2016
- Submitted to the NC Division of Public Health – September 2016
State of the County’s Health Report (SOTCH) for Columbus County will be submitted:

- March 2017
- March 2018
- March 2019
Acknowledgments

We would like to thank the Health Assessment Task Force members and Healthy Columbus members. Without their contributions, this undertaking would be impossible.

Columbus County 2015 Community Health Assessment Task Force Members:

Terrie Priest, Columbus Regional Healthcare System
Meleah Collier Evers, Columbus County Cooperative Extension
Leslie Jones, Waccamaw-Siouan Tribe
Selena Rowell, Columbus County Partnership for Children
Lisa Clarke, Lower Cape Fear Hospice
Jamika Lynch, Columbus County Health Department
Rhonda Bullard Dutton, Whiteville City Schools
Vickie Pait, Families First
Sonja Jones- Columbus Regional Healthcare System
Sherry Shepard- Columbus Regional Healthcare System
Amber Bellamy, Columbus County DREAM Center
Carol Caldwell, Columbus County DREAM Center
Gabriella Maggiolo, Columbus County Health Department
Kim Smith, Columbus County Health Department
Sarah Gray, Columbus County Health Department

Healthy Columbus Task Force Members:
Lorraine Matthews, Columbus County Health Department
Pat Ray, community member
Radene Caisen, Columbus County DREAM Center
Timothy Lance, Mt. Olive Missionary Baptist Church
Steven Worthington, Columbus County Sheriff’s Office
Shawn Maynor, Town of Bolton
Julie Strickland, Columbus County Parks and Recreation
Darrell Trivette II, Chadbourn Police Department
Letter from the Health Director

It is my pleasure to present the 2015 Columbus County Community Health Assessment. I hope that this document will serve as a catalyst for change in our communities, especially since our county has been identified for last six years as the state’s least healthy county.

I would also like to express my sincere gratitude to our community partners, and the role that they played as we planned for and collected information for the 2015 Community Health Assessment. Without these strong allies, our health assessment would not have been distributed and collected from all across our county. Their time and commitment is invaluable.

If you have questions about the health assessment, I encourage you to the health department at the number below.

In health,

Kim Smith

Kimberly L. Smith
Health Director
910-640-6615
Columbus County Geographical Features and brief History

Columbus County can be found a short distance from the Atlantic Ocean, in the fertile lowlands of the coastal plain. This 959 square-mile expense of land occupies one of the most Southeastern sections of the state. The South Carolina state line borders Columbus County, with Brunswick County to the east and Robeson County to the west. Bladen and Pender counties bound Columbus County on the north.

The land and its heritage have been shaped by many geographical features. Lake Waccamaw, the largest natural lake from New York to Florida, was the site of Indian habitation long before white men arrived. The Waccamaw River, which flows from Lake Waccamaw, has linked the most southeastern section of the county to South Carolina and its coastal ports. The county’s western limits are defined by the swift, dark waters of the Lumber River. A northeastern section of the county is compromised by the Cape Fear River. Access to the Cape Fear and port city of Wilmington has been a major factor in settlement and commercial development of the county. Before roads were constructed, the Cape Fear, Lumber, and Waccamaw Rivers were the main arteries which penetrated the dense woodlands of this area.

Columbus County is divided into the following towns:

- Bolton- The town of Bolton has a total area of 3.1 square miles, all of it land.
- Brunswick- The town of Brunswick has a total area of 0.4 square miles, all of it land.
- Cerro Gordo- The town of Cerro Gordo has a total area of 0.8 square miles, all of it land.
- Chadbourn- The city of Chadbourn was started in 1882 and incorporated in 1886. The first charter stipulated that there should be no legalized sale of whiskey in the town, and Chadbourn has the distinction of never having had liquor stores in it. Nicknamed the “Sunny South Colony” in the early 1900s, Chadbourn is home to the North Carolina Strawberry Festival, the longest-running agricultural festival in the state.
- Clarendon- The town of Clarendon has a land area of 38.1 square miles.
- Delco- The town of Delco is formerly known as Brinkley and Pershing. Delco is also the home of Acme Delco Middle School, Home of the Trojans.

- Evergreen- The town of Evergreen has a land area of 3.86 square miles.

- Fair Bluff- Fair Bluff, nestled against the banks of the nationally recognized “Wild & Scenic” Lumber River, is home to the southeastern North Carolina Watermelon Festival. The Old Trading Post in Fair Bluff, probably the oldest building in Columbus County, stands on the banks of the Lumber River. Built in the late eighteenth century, people from Robeson, Bladen, and Columbus counties brought farm produce and naval goods to be sold or exchanged for other products.

- Hallsboro- The town of Hallsboro has a land area of 3.26 square miles. Hallsboro is also the home of Hallsboro Elementary and Hallsboro Middle School.

- Lake Waccamaw- From its sandy shorelines to its tree-lined natural areas, Lake Waccamaw offers peaceful surroundings, an intriguing natural history and fun in the sun. You can view one of the greatest geological mysteries of the eastern United States—the phenomenon of Carolina bays; it boasts rare plants such as the carnivorous Venus Flytrap and several animal species found nowhere else on earth, such as the Waccamaw Killifish.

- Nakina- Nakina is a small community that lies just North of the South Carolina - North Carolina border. It was until the 1990's best known for producing very high quality flue cured tobacco.

- Riegelwood- Riegelwood is the home of International Paper Mill. The mill supports civic and non-profit groups within a 50-mile radius of the mill.

- Tabor City- Tabor City is the southernmost town in Columbus County. Once known as the “Yam Capital of the World,” Tabor City pays tribute to the area’s sweet potato crop with the annual North Carolina Yam Festival.

- Whiteville- Whiteville holds the role as county seat. Whiteville was chartered in 1873 and is home to many historic sites and the Harvest Days Festival.
There are also nine unincorporated townships within Columbus County which include, Bogue, Bug Hill, Lees, Ransom, South Williams, Tatums, Welch Creek, Western Prong and Williams.

**Explanation of Information and Appendices**

The 2015 Community Health Assessment team chose the same questions as the 2012 Community Health Assessment in order to better compare data. However, over 800 surveys were collected in 2015 versus approximately 1200 in 2012. The team felt that even though the number of surveys distributed was lower, the data is still representative of the county’s population. This will be described more in the next section, the “Community Health Survey Response” information.

A copy of the bilingual community health opinion survey is located in Appendix A.

Appendix B contains the Columbus County Health Databook.

Appendix C contains a Substance Abuse needs assessment that was conducted in 2014-2015 by the Columbus County Health Department, Columbus County Sheriff’s Office, Chadbourn Police Department, and Tabor City Police Department.

Appendix D contains a report that was compiled in 2013 using GIS technology (by Holland Planning Consultants). This report is included because it contains health data and maps that can be used by residents to see where there are higher concentrations of chronic diseases, concentration of elderly population, proximity to grocery stores/food outlets, and proximity to parks and recreational facilities. There is also additional information that is contained.

Appendix E is a list of parks and recreational facilities in the county, as well as non-profit organizations (mainly faith organizations) that offer free group exercise sessions.

Appendix F contains resources in our county, including healthcare.
**Primary Data- Questions and Responses from the Community Health Assessment Survey (results are combination of paper and pen surveys and Survey Monkey responses)**

**Question 1:** In your opinion, what do most people die from in your Community?

According to the community, Heart Disease (40%) and Cancer (38%) are the top two leading causes of death. Stroke/Cerebrovascular Disease and Motor Vehicle Deaths follow with 6% as well as Diabetes with 5%. 2% of the community chose Homicide/Violence while 1% felt HIV/AIDS, Asthma/Lung Disease, or other health issues were what people suffered from.

Using the same survey in 2012, we found that 43.1% of people felt that heart disease was the leading cause of death, followed by cancer at 33.6%, and stroke at 8.22% (caution; 865 surveys were collected in 2016 versus 1200 in 2012).
Question 2: In your opinion, what is the biggest health issue of concern in your community? (Check only one)

The above graph illustrates the number and percentage of the population surveyed who feel that the stated issues are the biggest health concerns in their community. According to the community, Chronic Disease (i.e. Cancer, Diabetes, and Heart Disease/Stroke) is the most concerning health issue with 43%. Drug/Alcohol Abuse and Obesity are the next biggest health issue of concern with 21%. 4% of the community feels Gangs/Violence is the biggest health issue of concern while 3% feel it is Teen Pregnancy. 2% of the community feel Dental Health and Mental Health are the biggest concerning health issues while 1% feels Child Abuse, Tobacco Use, Vehicle Crashes, or other health issues are the biggest concerns. This is similar to 2012 results when 46% of people cited chronic diseases as the biggest issue, followed by drug and alcohol abuse, at 21.3% and obesity at 12.5%.
Question 3: In your opinion, what do you think is the main reason that keeps people in your community from seeking medical treatment? (Check only one)

The above graph illustrates the number and percentage of the population surveyed who feel that the stated issues are the main reasons people in the community do not seek medical treatment. According to the community, 67% feel Lack of insurance/Unable to pay for doctor's visit is the main reason keeping people in the community from seeking medical treatment. 10% of the community feels Lack of knowledge/Understanding of the need is the main reason, while 9% of the community feels it is Fear (not ready to face health problem) that keeps people from seeking medical treatment. 6% of the community feel No appointments available at doctor when needed/Have to wait too long at doctor's office is the main reason that keeps people from seeking medical treatment. 3% of the community said None/No Barriers while 2% feel it is Not Important. 1% of the community feel Health services are too far away, transportation, or other reasons are what keep people from seeking medical treatment. In 2012, 66% residents reported that lack of insurance was the main reason that kept people from accessing health care.
Question 4: Which factor do you feel most affects the quality of the health care you or people in your community receive? (Check only one)

84% of residents cited that economic factors are what affects people’s quality of life, followed by education/the ability to read at 7%. In 2012, 75% reported economic reasons affecting people’s quality of life, followed by education at 8%.
Question 5: In your opinion, do you feel people in your community lack the funds for any of the following: (Check all that apply)

The above graph illustrates the number and percentage of the population surveyed who feel that people in their community lack the funds for the stated resources. According to the community, 360(n=860) or 41% of those surveyed reported they feel people in their community lack the funds for Health Insurance, and 298 feel people in their community lack funds for medicine(33%). 212 of those surveyed feel people in their community lack funds for Utilities (i.e. Electricity, Fuel, Water), and 201 feel people in their community lack funds for Food. 188 of those surveyed feel people in their community lack funds for Transportation and 141 feel people lack funds for Home/Shelter. 8 of those surveyed feel people in their community lack funds for other resources. In 2012, 26% of residents reported that health insurance was the first reason that people had the lack of funds.
Question 6: How do you rate your own health? (Check only one)

The graph above shows the number and percentage of the population surveyed who rated their personal health. As shown, 42% of the community rated their personal health as good. 31% of the community rated their personal health as very good while 17% rated their personal health as fair. 7% of the community rated their personal health as excellent while 2% rated their personal health as Poor. 1% answered Don’t Know/Not Sure. In 2012, 38% reported their health as good, followed by very good at 31%.
Question 7: What does your community need to improve the health of your family, friends, and neighbors? (Check all that apply)

The graph above shows the percentage of those surveyed who feel that the stated resources are needed to improve the health of their family, friends, and neighbors. 279(32%) of those surveyed feel job opportunities are needed and 183 feel safe places to walk/play are needed to improve the health of the community. 166 of those surveyed feel additional health services are needed, 165 feel wellness services are needed, and 164 feel healthier food choices are needed to improve the health of their family, friends, and neighbors. 150 of those surveyed feel substance abuse rehabilitation services are needed and 139 feel recreation facilities are needed to improve the health of the community. 130 of those surveyed feel after-school programs are needed, 123 feel mental health services are needed, and 106 feel transportation is needed to improve the health of the community. 77 of those surveyed feel specialty practices are needed. In 2012, 18% cited job opportunities as most needed to improve health of family, friends, and neighbors.
Question 8: What health screenings or education/information services are needed in your community? (Check all that apply)

The graph above shows the number and percentage of the population surveyed who feel that the stated health screenings or educational/informational services are needed in their community. 269 of those surveyed feel cholesterol/blood pressure/diabetes health screenings or educational/informational services are needed in their community (31%). 231 (27%) of those surveyed feel cancer and 214 feel substance abuse health screenings or educational/informational services are needed in their community. 199 of those surveyed feel nutrition and 191 feel physical activity health screenings or educational/informational services are needed in their community. 181 feel dental screenings are needed in their community and 169 feel mental health screenings or educational/informational services are needed in their community. 147 of those surveyed feel teen pregnancy prevention programs are needed, followed by literacy (139) and HIV/Sexually Transmitted Diseases (114). 105 of those surveyed feel reckless driving/seatbelts/child car seats educational/informational services are needed in their community and 93 feel eating disorder health screenings or educational/informational services are needed. 83 of those surveyed feel emergency preparedness educational/informational services are needed in their community. Vaccinations (82) followed by disease outbreak screenings (63) were the reported by residents as least needed in their community. In 2012, 11% of respondents felt that cholesterol/blood pressure/diabetes screenings were needed, followed by cancer at 10%.
Question 9: Where do you and your family get most of your health information? (Check all that apply)

Of those surveyed, 315 (37%) get most of their health information from doctors/health professionals. 206 of those surveyed get their health information from the internet (24%). 97 of those surveyed get most of their health information from television and 93 get their information from family or friends. 62 of those surveyed get their health information from newspaper/magazines, 55 get their information from the health department, 23 get their information from the hospital newsletter, and 22 get their health information from the health education center. 19 of those surveyed get their health information from the Radio and 14 get their information from the library. In 2012, 32% reported receiving their information from a doctor, while 18% indicated the internet.
Question 10: Does your family have a basic emergency supply kit? (These kits include water, non-perishable food, any necessary prescriptions, first aid supplies, flashlights and batteries, non-electric can opener, blankets, etc.)

The graph above shows the percentage of the population surveyed that indicated whether their families have a basic emergency supply kit. Of those surveyed, 49% said yes and 48% said no. 3% of those surveyed reported don’t know/not sure. In 2012, 49% surveyed that they had a basic emergency supply kit.
Question 11: What would be your main way of getting information from authorities in a large-scale disaster or emergency? (Check only one)

The graph above shows the number and percentage of the population surveyed that indicated the primary means of obtaining information from authorities in a large-scale disaster or emergency will be from the stated resources; 37% of those surveyed will obtain information from authorities from the television, 24% will obtain information from text message (Emergency Alert System), 13% will obtain information from the Internet, and 12% will obtain information from the Radio. Of those surveyed, 6% will obtain information from authorities through social networking site, 4% said they were did not know/unsure of how they will obtain information, and 2% said they will obtain information from neighbors or print media (ex: newspaper). In 2012, 42% reported that they would obtain information from TV, followed by radio at 22% and text messaging at 10%.
Question 12: If public authorities announced a mandatory evacuation from your neighborhood or community due to a large-scale disaster or emergency, would you evacuate? (Check only one)

The graph above shows the percentage of the population surveyed who would be willing to evacuate from their neighborhood/community due to a mandatory evacuation ordered by public authorities during a large-scale disaster or emergency. Of those surveyed, 51% of the respondents indicated yes, they would evacuate. 45% of those surveyed indicated they did not know/not sure if they would evacuate from their neighborhood/community, while 4% indicated that they would not evacuate. In 2012, 74% responded that they would evacuate, followed by not sure at 16%.
Question 13: What would be your main reason you might not evacuate if asked to do so? (Check only one)

The graph above shows the percentage of the population surveyed that indicated what reason might cause them to not evacuate if public authorities announced a mandatory evacuation from their neighborhood or community due to a large-scale disaster or emergency. Of those surveyed, 43% of the respondents indicated it is not applicable, they would evacuate. 13% of those surveyed would not evacuate due to concern about leaving property behind, 11% don’t know/not sure if they would evacuate, and 9% of the respondents would not evacuate due to concern about family safety or concern about leaving pets. 4% of respondents indicated
they would not evacuate due to concern about traffic jams and inability to get out or due to lack of transportation. 2012 results indicated that 40% of persons would evacuate.

**Respondents Age**

The above graph shows the percentages of respondent’s age. 25% of those surveyed are 35-44 years of age, 20% of those surveyed are 45-54 years of age, and 18% of those surveyed are 55-64 years of age. 13% of respondents are 65-74 or 25-34 years of age. 7% of respondents are 75+ years of age and 4% of respondents are under 25 years of age. Our county’s population is comprised of 54.5% of people ages 18-64, and 80% of surveys were collected from these age ranges combined.

The majority of survey responses were females.
The above graph shows respondents race. 72% of those surveyed are White/Caucasian, 24% are Black/African American, 3% are Native American/Alaskan Native, and 1% chose other. Please see secondary data for the county’s racial make-up (64% are White, 30% are African American, and 5% are Hispanic /Latino, and 3% are Native American/Alaskan).
Are you Hispanic, Latino, or Spanish origin?

When the Community Health Assessment team came together, we used the same number of surveys needed that we developed for the 2012 Community Health Assessment as a guide (the county’s population from 2012 to 2016 has not increased significantly). Our goal was to distribute 10% of each town’s population and to have a 5% return. We met this goal and the total number of surveys collected was 865 for the 2016 health assessment.

Whiteville, which is the county’s seat, has the largest population compared to the other towns in the county, followed by Tabor City, and then Chadbourn.
hospital do you visit first? (Check only one)
Do you currently have Health Insurance?

In 2012, 76% reported that they had insurance coverage, and in 2016 85% reported that they had health insurance coverage.

Yes
No
No, but I did at an earlier time/previous job
No Answer Given/Left Blank
Focus Group Information

Focus groups were conducted in Chadbourn and Bolton, and at the December 2015 Board of Health/Board of Commissioner meeting. The responses are grouped and categorized together. Questions 5 and 6 were not posed to the Board of Health and Board of Commissioners, since our task force felt that these questions were better suited for those that were not in elected positions, or holding a position on a board (such as the Board of Health).

Focus Group Questions/Responses

1. What do you feel the county’s biggest health concerns are?
   Lack of economic opportunities/Lack of money/little or no income/ to get what is needed for health, people on drugs/substance abuse issues, diabetes, lack of education among residents of health; Chronic diseases (diabetes, heart disease), substance abuse, nutrition/healthy eating, lack of physical activity, teen pregnancy, poverty

2. What conditions/factors do you believe influence the health of our residents?
   No jobs (which equates to bad health), no education, lack of money required to buy healthier food,/ join gyms, young people selling and using drugs, prescription drug abuse, no in-county mental health/substance abuse rehabilitation services, poor Poverty, substance abuse, lack of jobs, changing traditions/adopting healthier habits (eating healthier, more physical activity)

3. What kinds of things would you like to see happen to improve the health of residents?
   More education provided, specialized physicians and better health clinics, better recreational facilities including walking trails, better nutrition (teaching residents how to eat healthier, growing their own gardens, growing school gardens), programs for young people/mentoring programs, Wellness center, more jobs, increase in the number of residents who have health insurance, access /creation of physical activity facilities

4. What do you and others do to stay healthy?
   Go to the doctor, exercise, eating healthier foods (less sugar, less calories), eating healthier, physical activity, compliance with healthcare advice and getting regular health check-ups, following state laws such as seatbelts, motorcycle helmets

5. Do you feel that Columbus County Health Department hours of operation are based on community need?
   Hours are fine/ok, WIC (Women Infants, Children) hours be extended, possibly extend an hour or two during week in evenings to accommodate those who work later hours, offer appointments at later times if needed/requested by customers

6. How can we improve health services?
Cut greeting on phone/make it shorter, educate residents about all the services the health department offers, update website to be more user friendly

To summarize, most people in the focus groups felt that the county’s economic conditions influence health of the county because people lack the funding for health care/insurance, and because they cannot afford healthier foods, or have the ability to pay for physical activity/fitness centers. In addition, a large majority of the participants discussed the county’s youth and lack of programming and/or services that could accommodate youth. Substance abuse was mentioned several times in both focus groups, and residents voiced that it seems like substance abuse is becoming more severe in the county. Most of the residents felt that the health department’s hours were adequate, but they felt that the services we offered were not advertised enough, and that the information on our website needed to be updated and easier to navigate. Another frustration voiced several times was the difficulty in reaching the health department, as some voiced that the phone system was difficult to use.
Secondary Data*** Please also refer to “Databook Appendix” for additional secondary data

Demographic Data

Columbus County, NC Census Data

2014 Population= 56,953

- Persons under 5= 5.5%
- Persons under 18= 22.3%
- Persons 65 and older= 22.3%

Columbus County Racial Data (in percentages)

Persons below poverty level, 2009-2013= 26.9 % (in 2000 the US Census reported that 18% of residents were below the federal poverty level)

Source: State Center for Health Statistics, North Carolina

When comparing the leading causes of death data for years 2010 through 2014, we see that there is an increase in the number of deaths caused by diseases of the heart, while there have been slight declines in deaths attributed to cancer and cerebrovascular disease (stroke). In addition, in 2010 the leading causes of death did NOT include Alzheimer’s and assault (homicide), but did include septicemia and influenza and pneumonia.
For additional Columbus County Health Data please see the “Databook Appendix”

Prevention and Health Promotion Needs and Resources

As evidenced by the 2015 Community Health Survey, we found that most residents desired wellness screenings that include blood pressure, glucose, cholesterol as well as cancer. Other services that were desired as indicated were substance abuse followed by nutrition and dental screenings. Respondents also indicated that job opportunities, safe places to walk and play, additional health services, wellness services, and healthier food choices are needed to improve the health of their family, friends, and neighbors.

As of press time of the Community Health Assessment, the Columbus County Health Department, along with the support and participation from community agencies, offers the following health promotion resources (* Indicates evidenced based programs, or programs that have been shown to be effective by researchers)
*Chronic Disease Self-Management Program (Stanford) - a program designed to help those with chronic conditions to improve management of their condition(s)

*Diabetes Self-Management Program (Stanford) - a program designed to help those with diabetes to improve management of their condition

*Diabetes Prevention Program (CDC) - a program designed for those who are “borderline” or who have diagnosed/identified as at risk for Type II Diabetes

*Eat Smart Move, More Weigh Less - a program designed to educate participants of how to make healthier food choices, and be more physically active

*Faithful Families - a program designed for faith based communities, with emphasis on healthier eating, physical activity, and policy or environmental changes that can promote better health among congregation members

*Teen Pregnancy Prevention - Making Proud Choices - a program designed for middle and high school youth which focuses on adolescent pregnancy prevention, as well as making better decisions to improve the health of youth

*Promoting better health through promotion of healthier food choices at corner stores including Hispanic/Latino stores

*Diabetes and High Blood pressure screenings

*Body Mass Index screenings

*Improving worksite health by the adoption of polices and environmental changes

Fit and Faith (a faith based program designed to reward congregation members for increasing their physical activity)
*Substance Abuse Prevention- working with community members and faith leaders to address substance abuse prevention through implementation of community watch programs, and providing financial support to increase patrol within neighborhoods; also with healthcare organizations to deter the prescribing of narcotics, including pain medications.

The Columbus County Health Department also provides additional health education services, attendance at health fairs/community events, as requested by residents on other topics.

Some of our community partners are working to address HIV/STD screenings, infant mortality prevention/reduction, community screenings, diabetes management, establishing improved community parks, recreation facilities, improve community design to improve and construct new pathways for bicycling and walking, working with physicians to improve management of chronic conditions and reduce prescriptions for narcotics, and improving economic prosperity. Although this is not a complete listing and reflects community initiatives at press time, we encourage residents to call the Columbus County Health Department for more information.

**Community Concerns, Priorities**

After the completion of the Community Health Survey and collection of secondary data, the Columbus County Community Health Assessment Team determined the community’s health priorities by a voting process, where members kept in mind that we needed to address the areas of health that we have the capacity to address and change. For example, residents reported that chronic conditions and obesity were concerns, and these two areas were addressed in our 2012 Community Health Assessment Action Plans. Substance Abuse Prevention was also selected because efforts to address this issue began in 2013, and we anticipate that we will continue the efforts that we have begun. We did not include economic concerns, because our group did not feel that they did not have the capacity to improve the county’s overall economic prosperity.
The Community Health Assessment Action Plans are due to North Carolina Department of Health and Human Services in the fall of 2016, but we anticipate that we will have these developed and will have feedback from NCDHHS prior to this deadline.
Appendix A- Copy of the Community Health Survey

Columbus County Health Department

1. In your opinion, what do most people die from in your community? (Check only one)
   ☐ Asthma/Lung Disease ☐ Cancer ☐ Diabetes ☐ Suicide
   ☐ HIV/AIDS ☐ Heart Disease ☐ Stroke/Cerebrovascular Disease ☐ Homicide/Violence ☐ Motor Vehicle Deaths
   ☐ Other (please specify) ___________________

2. In your opinion, what is the biggest health issue of concern in your community? (Check only one)
   ☐ Asthma/Lung Disease ☐ Chronic Disease (i.e. Cancer, Diabetes, Heart Disease/Stroke) ☐ Child Abuse
   ☐ Dental Health ☐ Drug/Alcohol Abuse ☐ Gangs/Violence ☐ Mental Health ☐ Obesity
   ☐ Teen Pregnancy ☐ Tobacco Use ☐ Vehicle Crashes ☐ Other (please specify) ___________________

3. In your opinion, what do you think is the main reason that keeps people in your community from seeking medical treatment? (Check only one)
   ☐ Cultural/Health Beliefs ☐ Fear (not ready to face health problem) ☐ Health services too far away
   ☐ Lack of insurance/Unable to pay for doctor’s visit ☐ Lack of knowledge/understanding of the need
   ☐ None/No Barriers ☐ Not Important ☐ Transportation
   ☐ No appointments available at doctor when needed/Have to wait too long at doctor’s office
   ☐ Other (please specify) ___________________________

4. Which factor do you feel most affects the quality of the health care you or people in your community receive? (Check only one)
   ☐ Ability to read & write/Education ☐ Age ☐ Economic (Low Income, No Insurance, etc.)
   ☐ Language Barrier/Interpreter/Translator ☐ Race ☐ Sex/Gender ☐ Other (please specify) ___________________________

5. In your opinion, do you feel people in your community lack the funds for any of the following: (Check all that apply)
   ☐ Food ☐ Health Insurance ☐ Home/Shelter ☐ Utilities (i.e. Electricity, Fuel, Water)
   ☐ Medicine ☐ Transportation ☐ Other (please specify) ___________________________

6. How do you rate your own health? (Check only one)
   ☐ Excellent ☐ Very Good ☐ Good ☐ Fair ☐ Poor ☐ Don’t Know/Not Sure

7. What does your community need to improve the health of your family, friends, and neighbors? (Check all that apply)
   ☐ Additional Health Services ☐ After-School Programs ☐ Healthier Food Choices ☐ Job Opportunities
   ☐ Mental Health Services ☐ Recreation Facilities ☐ Transportation ☐ Wellness Services
   ☐ Safe places to walk/play ☐ Substance Abuse Rehabilitation Services
   ☐ Specialty Physicians (Type? ___________________) ☐ Other (please specify) ___________________________

8. What health screenings or education/information services are needed in your community? (Check all that apply)
   ☐ Cancer ☐ Cholesterol/Blood Pressure/Diabetes ☐ Dental Screenings ☐ Disease Outbreaks ☐ Other
   ☐ Substance Abuse ☐ Nutrition ☐ Emergency Preparedness ☐ Eating Disorders ☐ Pregnancy Prevention
   ☐ Physical Activity ☐ Literacy ☐ HIV/Sexually Transmitted Diseases ☐ Mental Health (including depression/anxiety)
Do you live or work in the county where you completed this survey?
I completed this survey in _____ County:

Do you currently have Health Insurance?
If yes, are you

Are you of Hispanic, Latino, or Spanish origin?
My race is:

What is your zip code? ______________

Does your family have a basic emergency supply kit? (These kits include water, non-perishable food, any necessary prescriptions, first aid supplies, flashlights and batteries, non-electric can opener, blanket, etc.)
Yes  No  Don’t Know/Not Sure

What would be your main way of getting information from authorities in a large-scale disaster or emergency? (Check only one)

If public authorities announced a mandatory evacuation from your neighborhood or community due to a large-scale disaster or emergency, would you evacuate? (Check only one)

What would be the main reason you might not evacuate if asked to do so? (Check only one)

For Statistical Purposes Only, Please Complete the Following:

I am:  Male  Female.
My age is:  under 25  25-34  35-44  45-54  55-64  65-74
75+

What is your zip code? ______________

My race is:  White/Caucasian  Black/African American  Native American/Alaskan Native  Asian  Pacific Islander  Other

Are you of Hispanic, Latino, or Spanish origin?  Yes  No

If yes, are you  Mexican, Mexican American, or Chicano  Puerto Rican  Cuban  Other Hispanic or Latino (please specify) ______

Do you currently have Health Insurance?  Yes  No  No, but did at an earlier time/previous job

I completed this survey in ______ County:  Bladen  Brunswick  Columbus  Duplin  New Hanover  Pender  Robeson  Sampson  Scotland

Do you live or work in the county where you completed this survey?  Both  Live  Work  Neither

When seeking care, what hospital do you visit first? (Check only one)

--------

1. En su opinion, de que muere la mayoria de las personas en su comunidad ? (Marca solo una)
   Asma/Enfermedad de los pulmones  Cancer  Diabetes  Suicidio  Virus del sida/SIDA  Enfermedad del corazon
   Embolia/Enfermedad cerebrovascular  Homicidio/Violencia  Muertes por accidente de vehiculo
   Otra enfermedad (favor de especificar)___________________________

2. En su opinion, que es la preocupacion de salud mas grande en su comunidad ? (Marca solo una)
   Asma/Enfermedad de los pulmones  Enfermedades chronicas (como cancer, diabetes, enfermedad del corazon/embolia)  Abuso de ninos

41
3. En su opinión, que prohíbe a las personas en su comunidad buscar tratamiento médico? (Marque solo una)
☐ Creencias culturales/de salud  ☐ Miedo (no están listos para enfrentar sus problemas de salud)  ☐ Los servicios de salud están muy lejos
☐ Falta de seguro médico/no puede pagar la visita con el médico  ☐ Falta de conocimiento/entendimiento de la necesidad
☐ Nada/no hay obstáculos  ☐ No es importante  ☐ Falta de transporte
☐ No hay citas disponibles con el médico cuando las necesitan/Tienen que esperar mucho tiempo en la oficina del médico
☐ Otra razón (favor de especificar) ____________________________________________

4. En su opinión, qué factor incluido abajo afecta más la calidad de los servicios médicos que recibe usted o las personas en su comunidad? (Marque solo una)
☐ Capacidad de leer y escribir/educación  ☐ Edad  ☐ Económico (falta de dinero o de seguro médico)
☐ Obstáculo de idioma/no interprete/no traductor  ☐ Raza  ☐ El sexo de la persona  ☐ Otra (favor de especificar) ____________

5. En su opinión, piensa usted que las personas en su comunidad les faltan dinero para algunas de las siguientes cosas? (Marque todas las cajas que aplican)
☐ Comida  ☐ Seguro de salud  ☐ Casa/Refugio  ☐ Empresas de servicios públicos (como electricidad, combustible, agua)
☐ Medicina  ☐ Transporte  ☐ Otra cosa (favor de especificar) ______________________

6. ¿Cómo evaluaría usted su propia salud? (Marque solo una)
☐ Excelente  ☐ Muy bien  ☐ Bueno  ☐ Mediano  ☐ Pobre  ☐ Yo no sé/No estoy seguro

7. ¿Qué necesita su comunidad para mejorar la salud de su familia, sus amigos, y sus vecinos? (Marque todas las cajas que aplican)
☐ Más servicios de salud  ☐ Programas para niños después de la escuela  ☐ Seleccionas de comidas más saludables
☐ Oportunidades para trabajar
☐ Servicios de Salud Mental  ☐ Centros de Recreo  ☐ Transporte
☐ Servicios de Bienestar
☐ Lugares seguros para caminar/jugar  ☐ Servicios de rehabilitación para los que abusan de las substancias
☐ Especialistas médicos (que tipo? ________________________)  ☐ Otra cosa (favor de especificar) ________________

8. ¿Qué exámenes de salud o educación/servicios de información son necesitados en su comunidad? (Marque todas las cajas que aplican)
☐ Cancer  ☐ Colesterol/Presión arterial/Diabetes  ☐ Exámenes dentales  ☐ Brote de enfermedad  ☐ Abuso de substancia (drogas o alcohol)
☐ Nutrición  ☐ Preparación para emergencias  ☐ Trastornos de comer  ☐ Prevención de embarazo  ☐ Actividad física
☐ Alfabetización  ☐ HIV/SIDA/Enfermedades sexuales transmitidas  ☐ Salud mental (incluyendo depresión/ansiedad)
☐ Manejando sin cuidado/Cinturones de seguridad/Sillas de carros para niños  ☐ Vacunaciones/Inmunizaciones  ☐ Otro(favor de especificar): ______

9. ¿De donde recibe usted y su familia la mayoría de su información de salud? (Marque todas las cajas que aplican)
☐ Centro de educación de salud  ☐ Familia o Amigos  ☐ Internet  ☐ Medico/Profesional de salud
☐ Televisión  ☐ Boletín informativo del hospital  ☐ Periodico/Revistas  ☐ Biblioteca  ☐ Departamento de Salud
☐ Radio

10. ¿Tiene su familia un botiquín básico de provisiones para emergencias? (Estos botiquines incluyen agua, comida no perecedera, sus medicinas y recetas necesarias, provisiones de primeros auxilios, linternas y pilas, abrelatas no eléctricas, cobijas, y mas)
☐ Sí  ☐ No  ☐ No sé/No estoy seguro

11. ¿Qué sería su manera principal de conseguir información de las autoridades en un desastre de gran escala o en una emergencia? (Marque solo una)
□ Television □ Radio □ Internet □ Medios imprimidos de comunicación (como el periodico) □ Sitio de red social y comunicaciones
□ Vecinos □ Mensajes de textos (Sistema de alertas para emergencias) □ Otra: (describela) ______________ □ No se/No estoy seguro

12. Si las autoridades publicas anunciaron una evacuacion obligatoria de su vecindario o comunidad por desastre de gran escala o de una emergencia, evacuaria usted ? (Marca solo una) □ Si □ No □ No se/No estoy seguro

13. Que seria la razon principal por la que usted no evacuaria si ellos le pidieron hacerlo ? (Marca solo una)
□ No aplicable, yo evacuaria. □ Falta de confianza en los oficiales publicos □ Preocupacion de dejar la propiedad detras □ Preocupacion de seguridad personal □ Preocupacion de seguridad de la familia □ Preocupacion de dejar animales domesticos □ Preocupacion de ser parado en trafico y incapacidad de salir □ Falta de transporte □ Problemas de salud (no puede ser movido)
□ Otra (describela): _________________________ □ No se/No estoy seguro

Favor de contestar las preguntas abajo para propositos estadisticos solamente

Yo soy: □ Hombre □ Mujer
Mi edad es : □ menor de 25 □ 25-34 □ 35-44 □ 45-54 □ 55-64 □ 65-74 □ 75 o mas
Mi codigo postal es : ______________________
Mi raza es □ Blanco/Caucasian □ Negro/Afroamericano □ Americano Nativo/Nativo de Alaska • Asiatico □ Isleno □ Pacifico □ Otra: ______
Es usted de origen hispano, latino, o espanol ? □ Si □ No
Si su contesta es si, es usted □ Mexicano/Americano Mexicano, o Chicano □ Puertorriqueno □ Cubano □ Otro hispano o latino (favor de especificar): ____________
Tiene usted ahora mismo algun tipo de seguro de salud ? □ Si □ No □ Ahora no, pero antes o en el trabajo anterior, si, yo tenia seguro medico
Yo complete este sondeo en el condado de □ Bladen □ Brunswick □ Columbus □ Duplin □ New Hanover □ Pender □ Robeson □ Sampson □ Scotland
Vive o trabaja usted en el condado donde completo este sondeo ? □ Los dos □ Vivo □ Trabajo □ Ninguno de los dos

Cuando usted esta buscando cuidado medico, que hospital visita usted primero ? (Marca solo una)
□ Hospital del Condado de Bladen □ Hospital de Cape Fear □ Sistema del cuidado de salud de la region de Columbus □ Hospital de Doshier Memorial □ Hospital General de Duplin □ Centro Medico de la Region de New Hanover □ Hospital de Pender Memorial □ Centro Medico de la region de Sampson □ Sistema del Cuidado de Salud de Scotland
Appendix B- Secondary Data/ Social Determinants of Health (as reported by the State Center for Health Statistics)

Social Determinants

Poverty, education, and housing are three important social determinants of health. These factors are strongly correlated with individual health. People with higher incomes, more years of education, and health and safe environment to live in tend to have better health outcomes and generally have longer life expectancies. Although these factors affect health independently, they also have interactive effects on each other and thus health. For example, people in poverty are more likely to engage in risky health behaviors, and they are also less likely to have affordable housing. In turn, families with difficulties paying rent and utilities are more likely to report barriers to accessing health care, higher use of the emergency department, and more hospitalizations. Below is a chart of the economic indicators that impact the quality of life for Columbus County residents. The unemployment rate is greater than the state’s rate and the need for state and federal resources is extremely high.

<table>

<td>$46,334.00</td>
</tr>
</tbody>
</table>

49.2% of the county’s residents were low-income on average from 2010 to 2012, meaning their incomes were less than twice the federal poverty level (NC Justice Center).

- The richest 5% of the county’s households had an average income that was 25 times greater than that of the poorest fifth of households and 6 times greater than that of the middle fifth of households on average from 2010 to 2012 (NC Justice Center).

- 15,163 people were eligible for Medicaid in this county in December 2013, an increase of 8.4% since December 2007 (NC Justice Center).

</tbody>
</table>

The above shows that Columbus is above the state rate for the following: Unintentional poisoning, homicides, infant mortality, percentage of positive chlamydia results for ages 15-24, new diagnoses of HIV, suicide, pneumonia and flu deaths, parentage of residents living in poverty, cardiovascular disease deaths and non-elderly uninsured. Columbus also has a lower life expectancy at birth compared to the state.
Columbus is higher than the state rates for teen pregnancies, child deaths, and heart disease, although these have decreased.
Other Fast Facts (NC State Center for Health Statistics)

- Total cancer rates in Columbus County remain slightly higher than the NC rate; however Columbus County minority males demonstrated the highest rate, followed by white males.
- Colon, Rectal, Anus cancer deaths were higher among African Americans with a rate of 13.3 compared to whites at 6.4.
- Diabetes deaths are higher among African Americans with a rate of 46.2 compared to 30.8 among whites.
- Heart Disease deaths among African Americans were higher at 328.6 compared to whites at 231.9.
- Columbus County has ranked last in the state of North Carolina for health outcomes for the past six years (Robert Woods Johnson Foundation, 2009-15).
- 25% of residents reporting that they smoke
- 34% are obese
- 50% of all residents either classify as overweight or obese
- 21% have no health insurance
- 29% report having no physical activity
- 41% of children live in poverty

Columbus County rates for stroke and diabetes is above the state rate. However, diabetes deaths among African Americans is higher than that of whites, along with heart disease deaths. According the NC State Center for Health Statics, there are 25% of residents who report smoking, 34% are obese, and ½ of all residents classify as overweight or obese. Furthermore, almost ½ of residents report that they are NOT physically active. These numbers support data that shows that Columbus rates of the aforementioned are higher than state rates.

**Columbus County and Peer Counties**
As determined by the State Center for Health Statitics, Columbus County’s peer counties are Duplin, Halifax, and Sampson. Peer counties are similar in population and demographics.

Please view the table below to see how Columbus compares to our peers for the selected leading causes of death and other social determinents of health. These causes of death and social determinents of health were selected because they reflected the health issues of concern for Columbus residents in the 2015 Community Health Assessment. Heart disease and cancer deaths are higher than that of our peer counties.

A Health and Wellness Initiative for Columbus County
Acknowledgments

This project was made possible by a Healthy Communities grant obtained by the Columbus County Health Department and also through funding from the Community Transformation Grant Project. *A Health and Wellness Initiative for Columbus County* was prepared with the gracious support and feedback of county health department staff and the Health and Wellness Advisory Committee. The County would like to thank the following committee members:

- Kim Smith
- Sarah Gray
- Gabriela Maggioli
- Lorraine Mathews
- Tammie Robinson
- Henry Hawthorne
- Terrie Priest
- Robert Lewis/Gary Lanier

Special thanks are also given to the Columbus County Board of Health, the Columbus County Planning Board, and the Columbus Board of County Commissioners for initiating this process:

**Board of Health**
- Darryl Diefes, DDS, Chairman
- Peggy Blackmon
- Franklin Boone
- Nicole Martin, DVM
- Charles T. McDowell
- Christy T. Perdue, MD

**Planning Board**
- Barry Gelezinsky, Chairman
- Haywood Corbett, Vice Chairman
- Franklin Thurman
- Marshall Nichols
- Glenn Evans
- Al Leonard
- Daryl Hardwick
- James Sarvis

**Board of Commissioners**
- Charles T. McDowell, Chairman
- Ricky Bullard, Vice Chairman
- Amon E. McKenzie
- James E. Prevatte
- Giles E. (Buddy) Byrd
- P. Edwin Russ
- Trent Burroughs

The project was completed with the assistance of Holland Consulting Planners, Inc.:

- T. Dale Holland, AICP - Principal
- Wes MacLeod, ASLA - Urban Designer & Planner

CHAPTER 1 – INTRODUCTION

A. Plan Purpose

Our health and wellness is affected in many ways by the environment around us, including the built environment. Defined as “the environment as humans have shaped it,” our built environment includes our neighborhoods, buildings, roadways, and parks. Across the country, the design of our residential developments, roadways, and settlement patterns all contribute to the relative health and wellness of citizens. Land use and transportation planning lay the foundation for changes to our built environment, in turn affecting our air and water quality, our level of motor vehicle use, and ease of access to open space amenities (physical activity opportunities.)

Over the past ten years, community officials have seen an increasing need to address health disparities through changes to the built environment. This plan is a result of this evolving thought process and will be unlike most traditional planning documents—its focus is primarily on health related issues. The diagram below details the impact of land use and transportation systems on our built environment.

“A Health & Wellness Initiative for Columbus County” is an addendum to the Columbus County Comprehensive Plan adopted in January of 2012. The comprehensive plan is a plan that guides development and directs change for a community. It provides the basis and direction for a community’s land use policies and regulations. This plan examines the interrelationships among land use, transportation, utilities, the local economy, food sources, recreation, and community character. The increasing emphasis on public health as part of the comprehensive planning process has created a new model for community officials.

This new type of plan addresses the basic elements of urban form and land use, but also focuses on planning for public health — including increasing the availability of nutritionally vigorous foods, increasing physical activity in our communities by ensuring community walkability, and providing access to parks and recreational facilities. All of these factors can foster healthy and sustainable communities. Through collaboration with a broad range of interest groups and disciplines, a community planning strategy may be developed that has impacts well beyond the issues of transportation and land use policy.
The project was a six-month effort that included monthly meetings to solicit committee feedback and review completed work. Multiple academic sources and research reports were used to establish a general information base related to health and the built environment. Community data and health information has been collected from the 2012 Columbus County Community Health Assessment and local public health officials to create this "Health & Wellness Initiative for Columbus County." The following items are addressed in this plan:

- Socioeconomic status
- Concentration of elderly individuals (65+)
- Access to full-service grocery stores
- Proximity to quick service restaurants (fast food establishments)
- Population vulnerable to chronic disease
- Access to non-motorized transportation (bicycle and pedestrian facilities)
- Access to parks and recreation facilities
- Identification of health and wellness priority Areas

B. Planning Process

This project was conducted as an addendum to the Columbus County Comprehensive plan. A Health and Wellness Advisory Committee was selected to provide guidance during the project. The committee was composed of public health practitioners, hospital staff, and planning professionals.

C. Historical Context of Planning & Public Health

In the 19th and early 20th centuries, architects and urban planners in cities across the country helped defeat infectious diseases like cholera and tuberculosis by retrofitting buildings, streets, neighborhoods, clean water systems, and parks. In particular, buildings and streets were designed to increase air flow and provide daylight in an effort to combat bacteria.

In the 21st century, planners and urban designers can again play a crucial role in combating the biggest public health epidemics of our time: obesity and related chronic diseases such as diabetes, heart disease, and some cancers. Today, an unhealthy diet and the lack of physical activity are second only to tobacco use as the main cause of premature death in the United States.
States.
D. Planning: Land Use & Transportation Basics

The term land use planning is often used interchangeably with urban planning. At its most basic, land use planning determines which parts of a community will be used for residential, commercial, industrial, or recreational uses. This effort is achieved through land use ordinances such as zoning and subdivision regulations. Places we live, work, and play – planned and regulated by the aforementioned ordinances – are connected by transportation networks that require a planning process to become a reality.

Land use decisions also have an effect on the health and wellness of individuals within the community. Studies have shown that communities with a mix of land uses (residential, commercial, recreation, etc.) serve to increase the walkability of an area. Yet, conventional zoning districts often restrict multiple land uses, making new development single use in nature, thus, contributing to a lack of walkability and active transportation users.

Transportation planning includes several components. In the United States, the automobile is often the dominant force driving urban design. Prior to the last decade, transportation planning primarily dealt with the efficient flow of only the automobile. The vast demand for private vehicular transportation regularly dictates the scale of our streets, the relationship between buildings, and the speed at which we experience our environment. A shift in thinking has changed the way departments of transportation now perceive roadway design.

Now, planning for all modes of travel – the pedestrian, bicyclist, transit user, and motorist – has become increasingly important. This element of transportation planning has a tremendous effect on our ability to make travel mode choices. Roadways designed for all modes of use provide increased travel options with enhanced access to healthy food sources and support for a more active living lifestyle.

Roadways designed with only the automobile in mind (shown above) deter pedestrians and bicyclists from use and create barriers to these active transportation choices (Image Source: HCP).

Roadways designed for all users (shown above) have proven to increase multi-modal travel and active transportation use (Image Source: HCP).
CHAPTER 2 – COMMUNITY PROFILE

A. Introduction

This section provides a synopsis of the current population, housing, and economic conditions in Columbus County. Public Health and Wellness statistics have been summarized based on the 2012 Columbus County Community Health Assessment. Demographic data is sourced from both the 2000 & 2010 Census, NC Office of State Budget & Management (NC OSBM), and the NC Department of Commerce, Division of Employment Security Commission.

B. Population

1) Population Growth

Columbus County’s population increased from 54,749 in 2000 to 58,098 in 2010, an increase of 6.1%. By comparison, North Carolina’s total population increased from 8,049,313 in 2000 to 9,535,483 in 2010, an increase of 18.5%. A generalized distribution of the population in Columbus County is delineated on Map 1. Changes in population density from 1980 to 2010 are shown on Map 2. Areas that are dark blue experienced the greatest increase in population density during that time.
1) Population Growth Continued

Table 2 provides a comparison of Columbus County's 2000-2010 population to that of the surrounding counties of Brunswick, Pender, Bladen, and Robeson.

Columbus County's rate of growth significantly lagged behind that of the State and slightly trailed adjacent rural North Carolina counties. However, unlike many predominantly rural eastern North Carolina counties, Columbus County is not losing population. The County's population size is influenced by the overall growth in southeastern North Carolina.

Map 2: Columbus County- Change in Population Density
2) Population Age

Table 3 provides a summary of Columbus County and North Carolina’s 2000 and 2010 population by age distribution. The County’s overall population is older than that of the State. For the County overall, 43.9% of the 2010 population is below the age of 35, while 46.8% of North Carolina’s population falls below the age of 35. In addition, 15.2% of the County’s 2010 population is over the age of 65, while 12.9% of North Carolina’s population is over the age of 65. The population is aging as evidenced by the increase in the 55 to 64 age group from 2000 to 2010.

</tr>
<tr>
<td>Median Age</td>
<td>36.9</td>
<td>39.8</td>
</tr>
</tbody>
</table>

Source: US Census Bureau

The 2000 median age for Columbus County was 36.9, which increased to 39.8 in 2010. The 2010 median age for North Carolina was 37.4. Since 2000, the median age has increased statewide from 35.3 to 37.4; however, the population age in Columbus County has increased significantly from just over 36 years of age to 39.8 (see Table 3 above). Using the same percent increase, it is expected that the median age in Columbus County can be attributed to both the “aging in place” trend – whereby older adults are less likely to move from their residences – as well as a net migration of the younger segment of the population. In Columbus County, between the years of 2000 and 2010, the elderly population increased 33%. In 2010, 15% of the total population in the United States, over ninety percent of the elderly population has at least one chronic disease and more than 75% have at least two (1). To exacerbate the issue, in the next thirty years, the portion of the population over the age of 65 is expected to more than double (2). Although estimates vary in terms of the extent to which this segment of the population is aging, in 2030, more than nine percent of the population is estimated to be over the age of 85 (3). In Columbus County, elderly populations are scattered throughout the jurisdiction (see Map 3). This finding is consistent with findings nationwide that show elderly populations are found in rural and urban areas alike.
expected that bus County will be 46.3 by 2030.

certain that increases will be nothing

Moderate
3) Gender and Racial Composition

Columbus County’s gender and racial composition has been constant. In 2000, the male/female composition was 26,323/28,426, for a 48%/52% mix. By 2010, the male/female composition was almost the same at 28,753/29,354, for a 49%/51% mix. By comparison, the 2010 North Carolina distribution was 48.7% male and 51.3% female.

In 2000, 63.5% of the County’s population was White, with 30.9% Black and 5.6% Other. By 2010, the racial mix was 61.5% White, 30.5% Black, and 8.0% Other. The Other racial category increased from 5.7% in 2000 to 8.0% in 2010. This trend is expected to continue. The Black percent of total population decreased from 30.9% to 30.5% while the White population decreased from 63.5% to 61.5%. Thus, in 2010, the County’s total minority population was 22,363, or 38.5% of the total population.

4) Housing

Affordable housing is an increasing public health concern. Recent studies show that families contributing a large percentage of their income to housing are less likely to provide sufficient funds for essential items like food, health care, and medical insurance. Table 4 provides a summary of Columbus County housing problems based upon 2000 Census data. The summary has been compiled by the US Department of Housing and Urban Development (HUD) through its 2000 Comprehensive Housing Affordability Strategy. More recent HUD data is not available.

</table>
4) Housing, continued

Of Columbus County households reporting in 2000, 36.5% of rental households and 29.8% of owner-occupied households had some housing problems. Approximately 31.5% of renters and 27.7% of owners had a cost burden greater than 30% of gross income, and 16.8% of renters and 12.6% of owners had a cost burden greater than 50% of their gross income.

As of 2011, over half (52.2%) of Columbus County's housing stock was greater than 30 years old, highlighting the potential for large concentrations of substandard housing units.

5) Income

Income plays a significant role in health outcomes of individuals. Countless studies have noted the correlation between low-income populations and unhealthier lifestyles. In 2011, the Columbus County median household income was $34,938, compared to North Carolina's $46,291 median household income figure. In addition, nearly a quarter (23%) of Columbus County's population is considered below the poverty line. Concentrations of low-income individuals are located south of Whiteville, along the US 74/76 corridor between Cerro Gordo and Chadbourn, and north/south of Tabor City. See Map 4 for additional information.

In terms of personal income, Columbus County has continued to lag behind the state and nation. Table 5 provides a summary of per capita income from 2005 to 2009.

NOTE: Data not adjusted for inflation.

Source: Bureau of Economic Analysis, Regional Accounts Data
It should be noted that in 2011, Columbus County was designated a Tier 1 county by the North Carolina Department of Commerce. A Tier 1 county is the most economically distressed while a Tier 3 is the least stressed economically.
6) Educational Attainment

Educational attainment is a key factor in the overall health of humans across the United States. There is a well-known, large, and persistent association between education and health. This pattern has been observed in many countries and time periods, and for a wide variety of health measures. The differences between the more and the less educated are significant: in 1999, the age-adjusted mortality rate of high school dropouts ages 25 to 64 was more than twice as large as the mortality rate of those with some college education (5).

In Columbus County, the largest concentrations of individuals without a high school diploma are located southeast of Tabor City, just west of Chadbourn, and along the NC 130 corridor south of Brunswick. See Map 5 for more information.
7) Travel Time to Work

In North Carolina, Columbus County is the third largest county in terms of land mass. Because the county is also rural, residents experience, at times, lengthy travel times between destinations such as work or food outlets. As a result, the Columbus County labor force is very mobile. In 2008, approximately one-half of the County’s workforce traveled out of the County to their place of employment. In 2011, the mean travel time to work was 25.1 minutes. A 2006 study of 33 California cities found that adults who drove the most had obesity rates that were three times higher than those who drove the least, leading some public health researchers to identify excessive drive times as a risk factor for obesity (6).

CHAPTER 3 – HEALTH & WELLNESS CONCERNS

A. Introduction

A century ago, infectious diseases were the primary cause of death in the United States, but proper hygiene, environmental design, and immunization have led to the downfall of such diseases in the United States.

Now, chronic diseases, such as diabetes and heart disease, are the most common diseases in the US—they are also the most preventable. Chronic disease differs from infectious disease (or communicable disease) in the way that it occurs in individuals. Infectious diseases usually occur because of contact with an affected host, while chronic diseases may occur solely because of a sedentary lifestyle.

Obesity is a leading cause of chronic disease in the United States and increases the risk for a variety of chronic diseases including heart disease, stroke, glucose intolerance, and some forms of cancer. It is not a direct cause of most diseases, but unfavorably alters the risk factor profile.

For example, obesity may lead to increases in blood pressure and blood cholesterol, which in turn, can lead to cardiovascular disease and strokes. The design of the built environment plays a role in both chronic disease and obesity.

B. Health & Wellness Issues

In 2010, the Columbus County Health Department collaborated with the Healthy Carolinians Task Force to initiate a county-wide survey and to complete the “2012 Columbus County Community Health Assessment,” to gauge the health of county residents. Surveys were distributed to 1,300 residents of Columbus County. The surveys were available both online and on paper.

"Chronic diseases - such as heart disease, stroke, cancer, diabetes, and arthritis are the leading cause of death and disability in the United States."

Source: Centers for Disease Control
B. Health & Wellness Issues, Continued

The results of the survey were collected and compared to statistical data compiled by other local or state agencies to create a picture of the health of the community. According to the Assessment, the "Top 5 Serious Disease & Disability Problems" were listed as the following:

1. Heart Disease
2. Cancer
3. Stroke
4. Diabetes
5. Homicide/Violence

According to the Centers for Disease Control (CDC), chronic diseases - including heart disease, stroke, and diabetes - are among the most costly of all health problems in the United States. In Columbus County, the primary cause of death is heart disease. Columbus County identified seven priorities over the last few years as a result of the Community Health Assessments. These priorities are as follows:

1. Drug/Substance Abuse
2. Access to Health Care
3. Heart Disease
4. Physical Activity/Nutrition
5. Infectious Diseases
6. Unintentional Motor Vehicle Injuries
7. Diabetes

C. Planning for Public Health Survey

Part of the planning for public health process included an active living and healthy eating-focused survey distributed to Columbus County health department clients. The short survey was completed by health department patients prior to receiving service. It was distributed in both English and Spanish versions. A total of 76 surveys were collected. Survey questions are as follows:

1. Where do you most commonly shop for food items?
   - Convenience Store/Gas Station
   - Discount Store (Family Dollar, Dollar General, etc.)
   - Grocery Store (Hill's, Food Lion, Wal-Mart)
   - Farmers' Market
   - Eat at restaurants most often/go to drive-through
2. **What is your primary transportation mode?**  
(Choose one)  
. Car/Truck  
. County Van Service  
. Walk  
. Bicycle  
. Friends/Family

3. **When do you feel safe walking around your neighborhood?**  
. At night  
. During the day  
. Both night and day  
. Don't feel safe

4. **Which of the following would you like in your neighborhood?**  
(Please check ONLY two)  
. Mobile (trucks) food markets  
. Farmer's market  
. Neighborhood food bank  
. Community gardens  
. Sidewalks  
. Parks  
. Fresh fruits and vegetables available in gas stations/convenience stores  
. Classes on home vegetable gardening

5. **How long have you lived in Columbus County?**  
. 0 – 5 years  
. 5 – 10 years  
. 10 – 20 years  
. 20 years or more  
. My whole life

---

*The majority of respondents listed 28472 as their zip code of residence.*
Survey results were similar for all but one question, that being number 4. The majority of respondents (94%) reported the "grocery store" as the place they most commonly shop for food. Close to 85% of respondents reported the private "car or truck" as their primary means of transportation. Less than 10% of respondents reported not feeling safe walking around their neighborhood. Nearly 65% of respondents have lived in Columbus County for more than twenty years.

Question number 4, asking what types of active living/healthy eating amenities would you like in your neighborhood, had varying results as mentioned earlier. The two highest scoring amenities were "parks," with 29 points, and "farmers' market" with 21 points (see Figure 2).

D. Barriers to Health and Wellness

The advisory committee was asked to list the "Top 3" barriers to improving health and wellness outcomes for Columbus County residents. Lack of insurance, low incomes and wages, reliable transportation, education, and access to recreational opportunities were the most commonly listed barriers to health outcomes. All of the barriers were recorded and a word cloud was created to better represent the results (see the Figure 1).

E. Access to Health & Wellness Services

Today, highly trained medical staff and other healthcare professionals represent a range of specialties and are dedicated to the well-being of every patient in their care. Columbus Regional Healthcare System is licensed as a not-for-profit organization accredited by the Joint Commission on Accreditation of Healthcare Organizations. Carolinas Healthcare System (CHS) works to improve and enhance the overall health and well-being of its communities through high quality patient care, education and research programs, and numerous collaborative partnerships and initiatives.

Their collective goal is to deliver the best possible care, the latest procedures, and a continuous network of care with services including:

- Rehabilitation Services
- Infection Control
- Cardiac Services
- Laboratory Services
- Imaging
- Family Birthing Center
- Robotic Surgery
- Surgical Services
- Emergency Care
- Acute and Critical Care
- Cancer Care

In addition, outreach and education services are available to residents of the area. These services include Diabetes Education, American Heart Association classes, and Safe Sitter Training, as well as sponsoring community events and expos, and providing speakers for off-site educational programs.

The other regional medical facilities under the Columbus Regional Healthcare System include:

- Southeast Primary Care
- South Columbus Medical Center
- Baldwin Woods Diagnostics
- Donayre Cancer Care Center
- Carolina Urology Associates

Healthcare providers with general practitioners were identified across the county. Locations and proximity to each were created using spatial analysis. Areas along the US 74/76 corridor have the greatest access to healthcare providers (see Map 6). Areas shown as white on the map are located greater than a ten-minute drive from the closest healthcare provider.

1) Medical Facilities

Columbus Regional Healthcare System (CRHS) serves as Columbus County’s primary healthcare provider. In addition to the main hospital located at Whiteville, NC, there are five additional locations that provide primary and preventive care and services.

Columbus Regional Healthcare System was founded by local physician Dr. Warren Edwin Miller in 1935. In Whiteville, NC. One year later, the home’s porches were enclosed to accommodate more patients and over the next 70 years, the hospital would be replaced twice. Licensed for 154 beds, governed by a local board of trustees, and managed by Carolinas Healthcare System, the current facility continues to grow and expand to meet the needs of its community. Carolinas Healthcare System is one of the nation’s leading healthcare organizations and provides a full spectrum of healthcare and wellness programs through-

2) Dental Health

North Carolina is ranked 47th in the nation for dentists per capita, with 4.3 dentists per 10,000 people. In fact, only eight North Carolina counties have dentist-to-patient ratios which exceed the national average of 6.0 dentists per 10,000 in population (Wake, Durham, Orange, Alamance, Guilford, Forsyth, Mecklenberg, and New Hanover Counties). Seventy-nine North Carolina counties are recognized as federally designated dental shortage areas.

Columbus County ranks significantly below the state average with 1.6 dentists per 10,000 residents and is currently recognized as a federally designated dental shortage area. The Columbus County Health Department provides an in-house dental clinic available to residents Monday through Thursday and a mobile clinic is available at Columbus County Schools Tuesday through Friday. Additionally, the East Carolina University School of Dental Medicine is working to improve access to dentistry throughout eastern North Carolina. This effort will involve the construction of several dental clinics.

3) Mental Health

Local Management Entities (LMEs) are where people can go to find information for receiving mental health, developmental disability, or substance abuse services. Eastpointe is the LME that serves Columbus County residents.

Eastpointe Mission

Eastpointe will work together with individuals, families, providers, and communities to manage and continually improved our behavioral healthcare system to ensure accessibility, accountability, and empowerment of people to achieve valued outcomes.

The corporate office is located in Beulaville, NC, but there are three other regional offices - Goldsboro, Lumberton, and Rocky Mount - with over 600 service providers throughout the Columbus County. Eastpointe also offers a 24-hour access/crisis care line.

North Carolina has changed the way Medicaid pays for mental health, developmental disabilities, and substance abuse services. The change is known as the 1915(b)/(c) Medicaid Waiver. The goal of this change was to make sure that people who need help are able to easily get high quality services. Eastpointe has been identified as a 1915(b)/(c) Medicaid Waiver site and provides the following benefits to the people it serves:

- Telephone contact 7 days a week, 24 hours per day
- Emergency referrals 24/7 within one hour
- Emergency care within 2 hours and urgent care within 48 hours
- Routine care within 10 working days
- Must offer all medically necessary services in the benefit plan regardless of whether or not there is a provider in the network for that service
- Qualified staff to evaluate service requested by service providers
- A qualified provider network, with consumer choice between at least 10 providers of different types of services and qualifications
- Written material explaining the benefit plan, how to access services, and consumer rights
- Better communication with access to local decision makers
- Reimbursement rates to incentivize best practices
- Keep funding in the public system and better use of savings
- Adjust existing services to meet changing needs through consumer and family feedback in an annual Consumer Satisfaction Survey

4) Health Insurance

Lack of health insurance was identified by the advisory committee as a significant barrier to healthy lifestyles. According to a survey conducted as part of the 2012 Community Health Assessment, approximately 76% of respondents reported having health insurance coverage, 16% reported not having any health insurance, and 8% stated their health insurance coverage was with a previous job. Approximately 18% of North Carolinians are without health insurance according to the 2011 Small Area Health Insurance Es-
Other findings of the 1,300 survey respondents include:

- 26.04% feel that Columbus County residents lack the funds to pay for health insurance. (2008 statistic: 38%)
- 20.85% feel that Columbus County residents lack the funds to pay for medicine. (2008 statistic: 29%)

F. Chronic Disease Factors

Whereas infectious diseases were the gravest health threats of an earlier era, the largest killers of our time have become chronic diseases such as heart disease and strokes, cancers, and diabetes, for which the leading risk factors are obesity, physical inactivity, poor diets, and smoking (see Figure 3).

Columbus County officials will use this plan to help combat factors in the built environment that may lead to obesity - the second leading preventable cause of disease and death in the United States - and chronic disease. Strategies and policies will relate to active living, healthy eating, and the prevalence of safe physical environments.

"Two of the four most common causes of chronic disease include lack of physical activity and poor nutrition. Both causes can be altered by lifestyle changes."

Source: Centers for Disease Control

G. Obesity Mechanisms

Obesity results from a positive caloric balance, meaning that the intake of calories is greater than caloric expenditure. Nutrition plays a direct role in determining caloric balance because it is the sole variable when accounting for caloric intake. Caloric output, however, is dependent on three specific variables. These include physical activity, resting metabolism, and the thermogenic effect of food. Thermogenesis occurs when your body raises its core temperature. When your body increases its heat or energy output, your metabolism increases and your fat cells are used as the main source of energy. Of the three variables, physical activity is the most often altered in order to increase caloric expenditure (7).

In general, obesity tends to be a multi-faceted problem with no one solution to combating its occurrence. However, there are certain segments of the population that are more likely to be obese, as it is more prevalent in the low socioeconomic status (SES) segments of society. Investigations have shown similar results in urban areas.
suburban, and rural communities. In addition, a childhood spent in poor social and economic conditions has been shown to lead to a less healthy adulthood. In both adolescent boys and girls, low SES and parental education levels were related to an unfavorable risk factor profile indicating a need for early intervention in low SES communities.

To identify areas of Columbus County that are considered low in socio-economic status, GIS analysis was used. Census estimates for educational attainment, employment, and income levels were combined to locate these areas. Concentrations of low SES are shown on Map 7.

H. Nutritionally Disparate

1) Full Service Grocery Access

You are what you eat – a common statement that rings true for many health practitioners. Increasing access to and encouraging consumption of fresh, healthy foods are important ways to address disease incidence and health care expenditures, particularly in under-served communities throughout Columbus County.

North Carolinians face a number of health challenges related to our food system. One is the incidence of diet-related chronic diseases, including obesity and diabetes, which are associated with consumption of nutrient poor, high-calorie foods. At the same time, food insecurity is present across the state, which exists when an individual or family lacks adequate or consistent access to the foods necessary to lead an active, healthy lifestyle.

Children’s health and wellbeing are connected to diet, nutrition and food security. Access to an ample quantity and variety of fruits and vegetables at school, at home, and in the community is critical. Access is especially important for school-age children, given that poor dietary habits can linger or worsen into the high school years and adulthood.

Programs such as Down East Connect and Feast Down East are actively trying to enhance our knowledge of the local food system while at the same time striving to increase our caloric intake of locally produced fruits and vegetables.

In Columbus County, there are 14 establishments that offer full service grocery items. For the purposes of this assessment, a “full service grocery” is defined as an establishment that is open 7 days a week, offers a variety of fresh fruits and vegetables at a competitive price, and accepts Supplemental Nutrition Assistance Program (SNAP), Electronic Benefits Transfer (EBT), and Benefits for Women, Infants, and Children (WIC). Full service grocery stores are located primarily in the municipalities throughout the county (see Map 8). Areas shown white on the map are located greater than a ten-minute drive from a full service grocery store.

In Columbus County, there are approximately 0.64 Quick Service Restaurants (Fast Food) per 1,000 residents. According to the journal Critical Public Health, there are only 0.0752 Quick Service Restaurants per 1,000 residents in the United States. This figure is significantly lower than that of Columbus County. However, when looking at figures from across southeastern North Carolina, the statistic appears more reasonable. For example, in Brunswick County and Bladen County the figures are 1.13 and 0.34 per 1,000 residents, respectively.

2) Quick Service Restaurants

Quick Service Restaurants or Fast Food Restaurants are establishments that are able to provide customers with a quick, consistent meal, with little or no table service. Quite often, these establishments are chain restaurants with many locations in a given region. According to the USDA, fast food accounted for a 325% increase in share of calories in the U.S. diet from 1978 to 2008 (8).

Figure 4: Changes in share of Calories from 1977 to 2008.

Full Service Grocery Store Drive Time*

- 2 Minute Drive or Less
- 2 to 4 Minute Drive
- 4 to 10 Minute Drive
- Greater than 10 Minute Drive

*Drive times are based on an estimation of...
2 minutes per mile of travel.
A recent study in the American Journal of Public Health noted “a significant relationship between the number of fast food restaurants and BMI for within a half-mile, one-mile and two-miles of the home, but only among lower-income study participants” (9). See Map 9 for locations of Quick Service restaurants (fast food) and the proximity to each. The municipalities of Whiteville, Brunswick, Tabor City, Chadbourn, and Lake Waccamaw all have Quick Service restaurants within a two-mile radius.
I. Population Vulnerable to Chronic Disease

In order to prioritize investment, it is important to locate spatially those areas most in need of health and wellness enhancement. To do so, GIS analysis was used to combine socioeconomic status and concentrations of the elderly population.

In general, the composite map showing Population Vulnerable to Chronic Disease is very similar to the Socioeconomic Status map. The most vulnerable populations are located south of Whiteville along NC 130 and south of Fair Bluff and Tabor City.
J. Mobility and Public Health

Mobility is generally defined as the movement of people from place to place. In the last hundred years, travel modes have shifted dramatically. Unfortunately, over the last forty years little emphasis has been placed on the non-motorized forms of movement, often to the detriment of cyclists and pedestrians. In fact, it was not until 1998 that the Federal Highway Administration authored a guidance manual addressing the design of bicycle and pedestrian facilities (10). During that same time, obesity rates for children and adolescents has more than tripled (11).

Walking trips have experienced a dramatic decline in recent decades. From 1977 to 1995, the U.S. experienced a 30% decrease in the number of all walking trips. Meeting the recommended daily exercise guidelines can be easily accomplished by such trips.

Yet, research shows that less than 10% of adults meet the recommended thirty minutes of exercise per day (12). The design of roadways and the urban environment may have much to do with the lack of exercise experienced in our daily travels.

Efficient flow and speed of the private vehicle, the primary determinant of vehicular level of service, is often the only component considered in designing a particular roadway (13). As a result, non-motorized travelers face difficulties due to a lack of facilities that provide for their safe and efficient movement.

Figure 5: In Columbus County, motor vehicle death rates are 40% higher than the state average.

Motor vehicle deaths are a recurring problem for Columbus County residents. According to the North Carolina State Center for Health Statistics, motor vehicle deaths are approximately 40% higher than the statewide average. Columbus County ranks 96 out of 100 counties in motor vehicle death occurrences. Research has also proven that lengthy vehicular drive times can risk factor for obesity. Individuals that account for the highest number of vehicular miles traveled are much more likely to be obese.
In the United States, the overwhelming majority of federal transportation funding (close to 80%) is dedicated to highways, yet over three-quarters of the population live in urban areas that do not necessarily need access to highways (14). At present, more emphasis is being placed on roadways that accommodate all modes of travel. Yet, in the United States the dominant mode of travel continues to be the private vehicle.

In 2010, only 1.9% of Columbus County residents listed walking as their primary means of transportation to work. That figure is significantly lower than the nationwide statistic. It is important to note, however, that Columbus County is very rural, decreasing the ability to walk for utilitarian purposes such as to work or to run errands.

Investments in transportation can either discourage or encourage use by non-motorized travelers. Research suggests that providing pedestrian and cyclist infrastructure will increase use and promote physical activity (15).
K. Non-Motorized Transportation (Access to Active Transportation)

Non-motorized transportation options include travel modes that require an individual to expend energy to reach his or her destination. Bicycling and walking are the two most common modes recognized as active transport.

In Columbus County, only sidewalks are available to area residents. Currently, there are no dedicated bicycle facilities or off-street multi-use paths available to cyclists. Sidewalk facilities are available in every municipality within the county except for Boardman and Cerro Gordo. Residents located in neighborhoods outside of municipalities have few active travel options (see Map 11).

In rural areas, however, a lack of dedicated facilities may not directly correlate to a lack of activity as significant options exist for unorganized activity in the form of hiking, hunting, or bird watching.
L. Physical Activity and Recreational Facilities

Studies show one of the most effective ways to offset weight gain is through increased physical activity. Coincidentally, individuals looking to increase physical activity encounter barriers when access to recreational facilities is limited. In particular, parks in Columbus County do not have active transportation connections to other recreation facilities or residential areas.

According to the Centers for Disease Control, the following is a list of items that can be accomplished through increased or regular physical activity:

- Weight Control
- Reduced risk of cardiovascular disease
- Reduced risk of Type 2 diabetes and metabolic syndrome
- Reduced risk of some cancers
- Stronger bones and muscles
- Improved health and mood
- Improved ability to do daily activities and prevent falls, for older adults
- Increased chances of living longer

Colu1r1bus County residents have many opportunities for active recreation within the county, though as mentioned previously, nearly every facility will require a motor vehicle for access, potentially lessening the amount of physical activity exerted at each facility (see Map 12).

M. Health & Wellness Priority Areas

In Columbus County, public health officials should strive to focus their efforts in areas that are most vulnerable to wellness issues. Spatial analysis was used to identify those areas most in need of health and wellness related facilities. High priority wellness investment and enhancement areas are shown in red on the Health and Wellness Priority Area map.

Each of the health Electors were ranked based on their impact on health outcomes. The advisory committee was tasked with identifying the most and least important factors impacting health outcomes. Low socioeconomic status was ranked as the most important contributing factor followed by proximity to a health care provider. Average commute to Work was ranked as the least important.

The following factors were combined in a weighted overlay analysis, the result of which is the Health and Wellness Priority Areas (see Map 13):

1. Socioeconomic Status
2. Proximity to a 1-Healthcare Provider
3. Proximity to Parks and Recreation Facilities
4. Proximity to a Full Service Grocery Store
5. Access to Non-Motorized Transportation
6. Concentration of Elderly (65+)

Proximity to a Quick Service Restaurant
Map 12: Physical Activity and Recreation Access

Legend
- County Boundary

- 5 to 10 Minute Walk
- Less than 5 Minute Bicycle Trip
- 5 to 10 Minute Bicycle Trip
- 4 to 10 Minute Drive
- Greater than 10 Minute Drive

*Drive times are based on an estimation of 2 minutes per mile of travel.
Areas shown as red on the map are considered high priority areas for health and wellness related capital improvements, policy changes, or community supported programming. These areas are, in general, considered to be of a low socioeconomic status and lack access to one or more amenities such as full-service grocery stores, recreational facilities, or healthcare providers.

Wetland areas (shown dark green) tend to be uninhabited. Health and wellness related improvements in these locations are not warranted.
CHAPTER 4– STRATEGIES

Both initiatives and strategies are provided in this chapter. The county and municipalities are responsible for implementation and may proceed with the initiatives and strategies as each sees fit.

A. Health & Wellness Related Agencies and Initiatives

Columbus County has been ranked the least healthy county in North Carolina since 2009, when the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute collaborated to launch the County Health Rankings & Roadmaps Program. Using data specific to each county, this program ranks the health of nearly every county in the nation. The Health Rankings illustrate factual data—what is known about what is making people sick or healthy. The Health Roadmaps help counties institute policies and programs to create healthier places to live, learn, work and play.

The Columbus County Health Department worked with the Columbus County Healthy Carolinians Task Force to create a community opinion survey in 2010. To ensure voices for as many Columbus County citizens as possible, the survey was offered throughout the county, accessible online, and on paper. The citizens’ responses showed that the top three issues, or the leading causes of death, in the community were heart disease, cancer, and stroke. The community assessment showed that chronic disease was the biggest health concern.

Since receiving the least healthy county rating, Columbus County officials and residents have worked to improve the health and mindset of its residents through education, programs, and actions. As of 2012, 3,000 residents have taken the opportunity to educate themselves and their families. Many businesses, churches, and other organizations have also taken positive steps to improve the health of their members.

Columbus County has several resources in place to aid in the health and wellness of area residents. Some of the following programs and resources are common across the state, while others are considered innovative approaches to creating a more healthy community. Initiatives are separated into the following categories: Educational, Healthy Eating, and Healthcare Access.

It should be noted that these initiatives may require expenditures of the jurisdiction interested in completing the program or action item.
Educational Initiatives

Education Programs
- Responsible Party: Columbus County/Municipalities/Volunteers
- Description: Educate citizens to help them make better, more informed decisions for their families.
- Action: Provide educational materials via presentations, workshops, classes, mailings, agri-tours, demonstrations, field days, community outreach, etc. Focus on safe, healthy eating, exercise, education.

Free Gardening Newsletters
- Responsible Party: Cooperative Extension
- Description: Newsletters mailed (or emailed) to people who sign up, covering a range of topics related to gardening or other home projects
- Action: Newsletters covering do-it-yourself projects, food and gardening, simple living, health, environment & green energy.

Healthy U Crew
- Responsible Party: Volunteers from Cooperative Extension, Health Department, and/or Healthcare Centers
- Description: Group of people (young and/or old) going into communities or establishments (community centers, YMCA/YWCA, daycares/schools, churches, etc.) to educate people about health and fitness.
- Action: Lunch & Learn - Employers allow presentations during work; Media Campaigns - Advertisements for healthier choices (food & exercise); Life Skills Courses - Students can attend free classes to learn healthful cooking & simple exercises.

Information Stations
- Responsible Party: County/Cooperative Extension/Volunteers
- Description: Set up stations around the county, areas lacking access to resources (libraries, news stands, schools, businesses, rest area, etc.)
- Action: Make educational information (healthful eating, exercise, growing/preserving, recipes, etc.) available to public.

Poster/Design Contests
- Responsible Party: Columbus County Farmers' Market
- Description: Poster contest for K-5 grades for "Choose Well, Eat Well"
- Action: Kindergarten thru Fifth Grade students create posters that highlight good nutrition and exercise, and benefits of healthier choices.

Active Living Initiatives

Community Sports Days
- Responsible Party: City/Parks & Recreation
- Description: Community-wide Field Days
- Action: Hold events in different community areas similar to those at school field days: tug-of-war, egg toss, three-legged race, obstacle courses, flag football, relay races, etc.

Eat Smart, Move More
- Responsible Party: Columbus County Health Department
- Description: Simple marketing to help people focus on easy, controllable efforts for health
- Action: Presentations to schools, churches, hospital groups, civic clubs, county offices to promote message. Emphasize healthful eating choices and easy exercise.
Employee Wellness Programs
- Responsible Party: Columbus County Health Department
- Description: Exercise classes for employees
- Action: Zumba, Tuesdays 5:30pm, Whiteville Rescue Building

Joint Use Agreement for Outdoor Use of School Facilities
- Responsible Party: County/Municipalities
- Description: Allow other organizations to use outdoor facilities for recreation
- Action: Allow interested organizations to use/reserve the outdoor facilities at area schools for recreation and activities.

Park Days
- Responsible Party: City/County Parks & Recreation Department
- Description: Sponsor “Fun Days” at the Park.
- Action: Encourage communities to get out and go to the park. Park can host cook-outs or events sponsored by businesses in area.

Sports Clinics
- Responsible Party: County/Municipalities
- Description: Offer sports clinics for the young and young-at-heart.
- Action: Sports clinics and leagues are usually geared toward children. Make sports clinics available to adult/older citizens as well. Can also offer family sports/activity clinics.

Tourism Focus on Healthy Eating and Activities
- Responsible Party: Discover Columbus County
- Description: Health & Wellness categories on website
- Action: Provide health category on the tourism bureau website to include exercise facilities, healthy dining options, destination/activity farms, farmers market and/or produce outlets, area playgrounds, hiking trails, etc.

Healthy Eating Initiatives

Community Farming
- Responsible Party: Cooperative Extension/County/Municipalities
- Description: Teach citizens how to grow plants inside or on patios/porches
- Action: Farmers or community volunteers help individuals start their own “indoor” gardens. Volunteers help educate, provide “starter kits” and/or seedlings.

Farm to School
- Responsible Party: Cooperative Extension/County/Municipalities/Farmers
- Description: Schools purchase fresh foods from farmers at discount and farmers receive difference from county budget
- Action: Farmers volunteer for program; provide schools with fresh produce for lunches, snacks, at comparable prices with some remuneration from county or funding source.

Sports Clinics
- Responsible Party: County/Municipalities
- Description: Exercise classes for employees
- Action: Zumba, Tuesdays 5:30pm, Whiteville Rescue Building

Joint Use Agreement for Outdoor Use of School Facilities
- Responsible Party: County/Municipalities
- Description: Allow other organizations to use outdoor facilities for recreation
- Action: Allow interested organizations to use/reserve the outdoor facilities at area schools for recreation and activities.

Park Days
- Responsible Party: City/County Parks & Recreation Department
- Description: Sponsor “Fun Days” at the Park.
- Action: Encourage communities to get out and go to the park. Park can host cook-outs or events sponsored by businesses in area.

Sports Clinics
- Responsible Party: County/Municipalities
- Description: Offer sports clinics for the young and young-at-heart.
- Action: Sports clinics and leagues are usually geared toward children. Make sports clinics available to adult/older citizens as well. Can also offer family sports/activity clinics.

Tourism Focus on Healthy Eating and Activities
- Responsible Party: Discover Columbus County
- Description: Health & Wellness categories on website
- Action: Provide health category on the tourism bureau website to include exercise facilities, healthy dining options, destination/activity farms, farmers market and/or produce outlets, area playgrounds, hiking trails, etc.

Healthy Eating Initiatives

Community Farming
- Responsible Party: Cooperative Extension/County/Municipalities
- Description: Teach citizens how to grow plants inside or on patios/porches
- Action: Farmers or community volunteers help individuals start their own “indoor” gardens. Volunteers help educate, provide “starter kits” and/or seedlings.

Farm to School
- Responsible Party: Cooperative Extension/County/Municipalities/Farmers
- Description: Schools purchase fresh foods from farmers at discount and farmers receive difference from county budget
- Action: Farmers volunteer for program; provide schools with fresh produce for lunches, snacks, at comparable prices with some remuneration from county or funding source.
Gardens - Community
• Responsible Party: Cooperative Extension/County/Municipalities
• Description: Identify land in low-income and/or rural areas that will serve as a space for smaller communities to raise their own produce.
• Action: Cooperative extension and local farmers assist communities in starting and maintaining their own gardens. Volunteers help educate, provide "starter kits."

Gardens – Individual
• Responsible Party: Cooperative Extension/County/Municipalities
• Description: Volunteer Program for people who want to learn to plant and maintain a garden for their individual family.
• Action: Cooperative extension and local farmers assist individuals in starting and maintaining their own gardens. Volunteers help educate, provide "starter kits."

Healthy Snack Vending Options
• Responsible Party: County/ Municipalities
• Description: Adopt a policy regarding the types of foods available in vending machines on school property.
• Action: Adopt a policy that states at least 50% of foods in vending machines must meet the following standards: *No more than 35% of calories from total fat (not including nuts or seeds); *No more than 10% of calories from saturated fat; *Zero trans fat (≤ 0.5 grams per serving); No more than 35% of calories from total sugars (except yogurt with no more than 30 grams of total sugar per 8 oz. portion as packaged); At least 3 grams of dietary fiber per serving in grain products; No more than 200 milligrams of sodium per package; No more than 200 calories per portion as packaged.

Local Food Challenge
• Responsible Party: Individuals or Organizations
• Description: Challenge members to complete a "Hundred Mile Diet." Eat only foods that can be produced or made locally. Range can vary.
• Action: Pick a range and try to eat only foods that can be grown or made locally. Employers, churches, various organizations can implement.

Show Off Your Garden Contests
• Responsible Party: Cooperative Extension/County
• Description: Participants submit photos & videos of their gardens or harvest to compete with others in the communities.
• Action: Contest can have specific themes: Largest Veggie/Fruit, Smallest Veggie/Fruit, Funniest, Most Variety, Prettiest, etc.

Start Your Own Farm Business Classes
• Responsible Party: Cooperative Extension/County
• Description: How-To Workshops for citizens interested in starting/growing a farming business
• Action: Farmers/volunteers help interested citizens start/grow a homegrown business.
Healthcare Access Initiatives

Community Health Fairs
- Responsible Party: Health Department and/or Healthcare Centers
- Description: Set up free events throughout community for simple health checks (Body Mass Index, blood pressure, glucose, bone density, etc.)
- Action: Set up free events in the community for simple health checks.

Healthy Community Workshops or Health Counseling
- Responsible Party: County Health Department
- Description: Set up workshops for communities with individuals in healthcare or nutrition field.
- Action: Question & Answer Sessions, One-on-One Counseling, E-mail or Hot-Line Advice, etc.

Home Visitation Program for Low-Income Mothers (Ongoing)
- Responsible Party: NC Dept of Health & Human Services
- Description: Funding to implement Maternal, Infant, and Early Childhood Development Home Visiting (MIECHV) Program
- Action: Columbus County Health Department to hire four additional registered nurses for program; improve maternal & child health, decrease pre-term labor, increase school completion & job readiness, healthy practices.

B. Health and Wellness Implementing Strategies

In general, health and wellness involves multiple interrelated subcategories including: General Health and Wellness, Active Living, and Healthy Eating. As such, each implementing strategy is categorized into one of those subcategories. The strategies are authored to improve health outcomes through changes to the built environment and community supported programming. Each strategy coincides with one or more of the eight health and wellness priority areas (see Map 12 on page 3-19 for more information). It should also be noted that costs may be associated with each strategy and responsibility for implementation belongs to each jurisdiction within the county.
Implementing Strategies: General Health and Wellness

1.1 The Columbus County Planning Department, City of Whiteville, and other municipal or county departments should work closely with the County Public Health Department to coordinate the prevention of poor health issues outlined in the 2012 Community Health Assessment. Neighborhood Implementation should be guided by the eight Health and Wellness Priority Areas.

Health and Wellness Priority Area(s): All

1.2 In general, Columbus County municipalities should revise ordinances to:

- Control the density and prevalence of tobacco/alcohol retailers and fast food restaurants in close proximity to schools;
- Offer incentives to developers who include grocery stores or fresh food markets in new development; and
- Make farmers’ markets and urban agriculture a permitted use in specific zones.

Health and Wellness Priority Area(s): All

1.3 Columbus County and municipalities should support wellness initiatives via bicycle rallies, marathons, fishing tournaments, etc., that provide the county a link with regional and private resources.

Health and Wellness Priority Area(s): All

1.4 The Columbus County Emergency Services Department and should work with local religious groups to provide emergency support systems for large scale or traumatic events.

Health and Wellness Priority Area(s): All

1.6 The Columbus County Health Department should ensure that the results of the health and wellness analysis outlined in this plan are incorporated into the county’s next Community Health Assessment update.

Health and Wellness Priority Area(s): All

1.7 The Columbus County Health Department and Columbus County Planning Department should take steps to create an Active Living & Healthy Eating working group that will continue to champion the Health and Wellness-related implementing strategies included in this plan.

Health and Wellness Priority Area(s): All

1.8 The County Health Department in collaboration with municipal jurisdictions to increase access to active recreation facilities and programs to residents. These efforts will specifically target youth-aged and elderly populations. The County in conjunction with the Columbus County/Whiteville School System will undertake the implementation of this strategy through the establishment of joint use agreements.

Health and Wellness Priority Area(s): 2, 5, 7, 9

1.9 The Columbus County Planning Department should take steps
to ensure, to the maximum practicable, that all county buildings and facilities are handicap accessible and will work to provide recreation options specifically targeting persons within the community with disabilities.

Health and Wellness Priority Area(s): All

I.10 In order to promote alternative means of transportation, the County Health Department may partner with Columbus County Planning Department and City of Whiteville to engage in the following:

• Conduct clinics to teach safe cycling to school age children.
• Strategically place signs and provide maps outlining existing and proposed pedestrian and bicycle routes.

Health and Wellness Priority Area(s): 5, 6, 7

Implementing Strategies: Healthy Eating

I.11 The Columbus County Planning Department, City of Whiteville, and other municipal/county departments should consider expanding working efforts with the Columbus County Extension Office and the Columbus County Public Health Department to achieve the following:

• Increase the opportunities for citizens to purchase and grow healthy foods.
• Support new opportunities for distribution of locally and regionally produced foods.
• Work to address disparities in access to healthy foods in inadequately served populations and neighborhoods.
• Support increased recovery of surplus edible food from businesses and institutions for distribution to food banks and meal programs.
• Work on increasing the availability of fresh fruits, vegetables, dairy and meat to the food support system including food banks and meal programs.

Health and Wellness Priority Area(s): All

I.12 The County should promote the Voluntary Agricultural District Program through marketing efforts. The applicable governing boards should set a threshold of acreage or numbers of farms to be added to the program each year.

Health and Wellness Priority Area(s): 4, 5, 8, 9

I.13 The County and City of Whiteville should continue to support the Columbus County Farmers’ Market. Additionally, the Columbus County Cooperative Extension office will look for opportunities to expand upon the Farmers’ Market operations. This task will include establishing farmers’ markets aimed at serving areas of the County with few options for fresh fruits & vegetables.

Health and Wellness Priority Area(s): 2, 3, 4, 5, 8, 9
1.14 The County should support efforts to improve access to local produce and value-added agricultural products. This effort will serve as an economic development tool for improving access to healthy eating options for underserved populations, as identified in this plan. 

*Health and Wellness Priority Area(s): All*

1.15 The Columbus County Planning Department and City of Whiteville Planning Department should work in conjunction with the Columbus Health Department and the Columbus County Cooperative Extension office to establish a promotional campaign focused on increasing the availability of fresh fruits and vegetables at corner/country store locations.

*Health and Wellness Priority Area(s): 1, 5, 6, 7*

1.16 The Columbus County Health Department should take steps to ensure that all food waste stemming from grocery and retail outlets is disseminated to non-profit entities that provide outreach for the county's needy populations.

*Health and Wellness Priority Area(s): All*

1.17 The City of Whiteville may consider the establishment of zoning overlay districts, which may modify the regulations of the underlying land use zone categories that guide the development of FRESH food stores to promote and protect public health, safety, and general welfare. These general goals include, among others, the following purposes:

- Provide greater incentives for FRESH food stores to locate in neighborhoods under-served by such establishments.
- Encourage FRESH food stores to locate in locations that are easily accessible to nearby residents.

A "FRESH food store" is a food store, where at least 6,000 square feet of floor area, or storage space is utilized for retailing the sale of a general line of food and non-food grocery products, such as dairy, canned and frozen foods, fresh fruits and vegetables, fresh and prepared meats, fish and poultry, intended for home preparation, consumption, and utilization; and

- At least 2,000 square feet or 30% of such retail space, whichever is greater, shall be utilized for the sale of perishable goods that shall include dairy, fresh produce, frozen foods, and fresh meats.

*Health and Wellness Priority Area: 6*

Columbus County Overview

Columbus County is quietly progressive in both industry and farming. It is a county on the verge of substantial growth. Business is attracted to the lower taxes and the willingness of economic leaders to make things happen. Also, its proximity to the coast, with the county seat, Whiteville, equidistant to both Myrtle Beach, S.C. and Wilmington, N.C. makes it ideal for retirees who still want to be part of a tightly-knit community while being only 30 minutes from some of the finest golfing and recreational opportunities in the world. Tabor City, the county’s second largest town, is 20 minutes from Myrtle Beach’s Grand Strand.

Within the county, tree-lined, scenic rivers that are largely undeveloped, offer remarkable beauty and solitude. Lake Waccamaw, the largest natural lake in the state, is pristine and feeds into the wild expanses of the great Green Swamp, which is home to a large number of bear, deer, and exotic plants. Fishing is popular in Lake Waccamaw, known for its white perch that gather in large schools in the summertime.

Medical care is excellent. The county has a 166-bed hospital that offers a wide array of diagnostic and cardiac services in conjunction with Duke University Medical Center. Industrialists will find two accommodating industrial parks - Tabor City Industrial Park and Southeast Regional Park, which boasts all amenities including water and sewer, natural gas, rail, and an on-site community college for training.

Access to the state port in Wilmington, Interstates I-95, and I-40 are available within one hour’s drive. A new interstate highway, I-73 traveling from Detroit to Charleston, is scheduled to run through Columbus County.

One of Columbus County’s greatest assets is Southeastern Community College, the impetus for much of the county’s progressiveness. It has highly-acclaimed nursing, computer and forestry programs, and annually sends scores of students on to North Carolina’s renowned public and private colleges and universities. Southeastern also organizes many of the cultural opportunities for both students and the community as a whole, featuring internationally renown celebrities including Julie Andrews and Pat Conroy, as well as concerts, art shows, and performances. The college provides a variety of customized training for local industry.

In short, Columbus County is the summation of everything good about the South—a temperate climate, untouched natural resources, progressiveness, and reasonable taxes and land prices; yet most of all, Columbus County offers a real sense of community comprised of friendly, hard-working people who genuinely believe this is the best place to live.

Adapted from Southeastern North Carolina Economic Development Information.
Columbus County
Community Resource Guide

This community resource guide was originally envisioned, compiled, published and distributed by the Ladder to Success program, a comprehensive Welfare-to-Work Program of Southeastern Community College. Ladder to Success provided job training and placement opportunities to 651 participants from September 1998 to September 2003. A special “thank you” goes to the Ladder to Success staff members for their hard work and dedication in compiling this guide.

The current edition of the resource guide is made available through the Discover Columbus project, a part of The Program for the Rural Carolinas, funded by The Duke Endowment.

August 2008
Child Care

The following is a list of child care providers and support services in Columbus County.
Columbus County Child Care Providers

**Bolton**

Beverly’s Day Care  
17125 Sam Potts Highway  
Bolton, North Carolina 28423  
(910) 655-4653  
Hours: 6:30 a.m. – 5:30 p.m.

Waccamaw Siouan Day Care  
7263 Old Lake Road  
Bolton, North Carolina 28423  
(910) 655-4358  
Ages: 6 Weeks – 5 Years  
Hours: 6 a.m. – 6 p.m.

**Cerro Gordo**

Little Blessings Preschool  
257 Church St.  
Cerro Gordo, NC 28430  
(910) 654-3119

Precious Minds Child Care, Inc.  
123 Haynes Lennon Highway  
Cerro Gordo, NC 28430  
(910) 654-3900

**Chadbourn**

Building Blocks Day Care  
117 West 5th Avenue  
Chadbourn, North Carolina 28431  
(910) 654-3980  
Hours: 6:30 a.m. – 5:30 p.m. Monday through Thursday & 6:30 a.m. – 4:30 p.m. on Friday

Chubby Cheeks Home Day Care  
320 J. D. Cartrette Road  
Chadbourn, North Carolina 28431  
(910) 653-5089  
24-Hour care available M-F.

Edu-Care Preschool Center # 102  
P.O. Box 394  
5589 Chadbourn Highway  
Chadbourn, North Carolina 28431  
(910) 654-4810

Kid Kare Educational Center  
P.O. Box 764  
4881 Chadbourn Highway  
Chadbourn, North Carolina 28431  
(910) 654-5278  
Hours: 6:30 a.m. – 6 p.m. M-F

Mary Kelly Home Day Care  
129 Kelly Street  
Chadbourn, North Carolina 28431  
(910) 654-4520  
Ages: 6 Weeks – 12 Years  
Hours: 6:30 a.m. – 6 p.m.

Sugar-Berry Day Care Home  
1855 Shade Fisher Rd.  
Chadbourn, NC 28431  
(910) 342-6819

**Clarendon**

Sweet as Home Preschool  
3111 Walter Todd Road  
Clarendon, North Carolina 28432  
(910) 653-5742  
Ages: 0-12  
Hours: 6:30 a.m. – 6 p.m.

**Delco**

Faith Christian Academy (half-day preschool)  
26998 East Andrew Jackson Highway  
Delco, North Carolina 28436  
(910) 655-2432

**Hallsboro**

Faye’s Family Child Care Home  
4393 Honey Hill Road  
Hallsboro, North Carolina 28442  
(910) 646-4592  
Ages: 6 Weeks – 12 Years  
Hours: 7 a.m. – 6 p.m.
Lake Waccamaw
Cynthia’s Home Day Care
2429 Old Northeast Road
Lake Waccamaw, North Carolina 28450
(910) 646-2019
Hours: 1st, 2nd & 3rd shifts and weekends available.

Von’s Family Day Care
P.O. Box 333
10782 Sam Potts Highway
Lake Waccamaw, North Carolina 28450
(910) 646-3724
Hours: 6 a.m. - 6 p.m. M-F

Riegelwood
Bright Stars Child Care
947 Pineland Rd.
Riegelwood, North Carolina 28456
(910) 655-4329

Jan’s TLC Home Day Care
13794 Old Lake Road
Riegelwood, North Carolina 28456
(910) 655-1555
Ages: 6 Weeks – 12 Years
Hours: 1st, 2nd and 3rd Shifts

Ransom Head Start Center
2694 General Howe Highway
Riegelwood, North Carolina 28456
(910) 655-4025

Sonya Marvin’s Home Day Care
311 Pineland Road
Riegelwood, North Carolina 28456
(910) 655-2438
Ages: 6 Weeks – 12 Years
Hours: 7 a.m. – 5 p.m.

Teresa’s Nursery & Child Care Center
11201 Old Lake Rd.
Riegelwood, North Carolina 28456
(910) 655-2635
Ages: 6 Weeks – 12 Years
Hours: 6 a.m. – 5:30 p.m.

Terry’s Angelic Day Care
805 Sandhole Rd.
Riegelwood, North Carolina 28456
(910) 655-3861

Tabor City
Daisy’s Good Beginnings
95 Vereen Ave.
Tabor City, North Carolina 28463
(910) 653-7215

Debbie’s Day Care
8405 Swamp Fox Highway East
Tabor City, North Carolina 28463
(910) 653-3027 – Office

Faulk Kidland
1545 Sandy Plains Church Road
Tabor City, North Carolina 28463
(910) 653-2584
Ages: 6 Weeks – 12 Years
Hours: 7:30 a.m. – 5 p.m.

Frances Day Care
105 Mills Drive
Tabor City, North Carolina 28463
(910) 653-3758
Ages: 6 Weeks – 12 Years
Hours: 6 a.m. – 5:30 p.m.

Happy Kids Day Care
1400 East 5th St.
Tabor City, North Carolina 28463
(910) 653-4851
Ages: 6 Weeks – 12 Years
Hours: 6:30 a.m. – 5:30 p.m.

Little Rug Rats Day Care
13977 East Swamp Fox Highway
Tabor City, North Carolina 28463
(910) 653-6304
Ages: 6 Weeks – 12 Years
Hours: 6 a.m. – 6 p.m.

Love-My-Kids
1856 Shug Norris Rd.
Tabor City, North Carolina 28463
(910) 653-2326
Ruth’s Little Wand Home Day Care
P.O. Box 833
914 West 6th Street
Tabor City, North Carolina 28463
(910) 653-9188
Hours: 7 a.m. – 5 p.m.

Tabor City Baptist Church Day Care
200 Live Oak Street

www.sccnc.edu  
Founded in 1964, Southeastern Community College is a public, comprehensive community college providing accessible educational, cultural, and social opportunities for area adults. More than 50 occupational and liberal arts curriculum programs are offered by the college. Classes are small, quality is high, and student services, such as counseling and tutoring, help students realize their potential.

SCC provides a wide range of continuing education courses throughout Columbus County, serving more than 7500 adults annually. Through the college, enriching cultural events are brought to the area, and community services are provided for citizens of all ages.

Whiteville, North Carolina 28472
(910) 642-7141, ext. 232
(910) 642-5658 – FAX
www.sccnc.edu

Description of Services: In SCC’s Basic Skills Program persons 18 years of age or older (sixteen and seventeen years olds may enroll with special permission) may earn a (GED) High School Equivalency Diploma, improve reading, writing, and math skills to help children or grandchildren with schoolwork, learn to read, get one-on-one instruction from caring instructors, and use textbooks that are available in the classroom. Individuals who have already obtained a diploma may enroll to improve their reading, writing and math skills before testing for curriculum placement tests.

The Adult Basic Education program is designed for persons 18 or older who function below the 9th grade level. Students receive individualized instruction in basic math, language, and reading.

The ESL program is designed for adult students whose native language is not English. Instruction focuses on English skills which will enable students to interact effectively in the community and at the workplace.

Satellite Sites are located at Acme Delco Middle, Chadbourn Middle, Evergreen Elementary, Hallsboro Artesia Elementary, Whiteville Central Middle, Whiteville Primary School, Williams Township, Guideway Elementary, and Tabor City Elementary schools; as well as Bolton Senior/Youth Center, Family Champions in Tabor City, Buckhead Tribal Center, Dothan Bristol Creek Church, Hampton Place Apartments, Mt. Southeastern Community College
Cooperative Education Program
P.O. Box 151
4564 Chadbourn Highway
Whiteville, North Carolina 28472
(910) 642-7141, ext. 327
(910) 642-5658 – FAX
www.sccnc.edu/coop.htm

Description of Services: This program stresses education based upon a cooperative arrangement between the college and employers to provide practical work experiences for students. Co-Op combines classroom study with employment related to a major and is based on the principle that learning does not confine itself to academic achievement but is equally dependent upon practical work experience.

Southeastern Community College
Dual Enrollment Program
P.O. Box 151
4564 Chadbourn Highway
Whiteville, North Carolina 28472
(910) 642-7141, ext. 265
(910) 642-5658 – FAX
www.sccnc.edu/coop.htm

Description of Services: The Dual Enrollment Program allows students to take college courses while they are still in high school. Courses may be taken during the day, at night or through distance learning as long as those courses do not interfere with the students’ regular high school courses. High school students enrolled in com-
Community college courses are exempt from paying tuition for these courses; however, fees and book costs are not exempt.

The sole purpose of this program is to provide expanded educational opportunities and additional educational enrichment experiences for high school students. In no way does it supplant the opportunities and experiences available at the high schools.

Credit earned at SCC by qualifying student is entered on a college transcript at Southeastern. College transfer courses may also be transferred to other two- and four-year institutions.

High school students may be concurrently enrolled in courses at SCC subject to the following conditions:
- A dual enrollment student must be at least 16 years old.
- A dual enrollment form must be completed and submitted for each semester the student seeks to qualify for enrollment at SCC. The form must be signed by the student’s parent or legal guardian, school counselor, principal, and the admissions officer at SCC. Forms are available at local high schools.

**Southeastern Community College**
**Educational Talent Search**
P.O. Box 151

(910) 642-7141, ext. 286
(910) 642-5658 – FAX
www.sccnc.edu/cat195.htm#talent

**Description of Services:** Educational Talent Search is funded by the United States Department of Education. The purpose of the program is to promote high school graduation and postsecondary enrollment. The counselors work in 12 schools throughout Columbus County and serve 850 students through counseling, workshops, and tutoring. They assist students in career and college planning and in securing financial aid for educational expenses. They provide educational college tours and cultural enrichment activities. Although Educational Talent Search serves sixth through twelfth grade students primarily in area schools, the program is also available to assist persons who have dropped out of high school or college and want to re-enter the educational system.

Description of Services: The Retired and Senior Volunteer Program (RSVP) enhances the lives of adults 55 years of age and older by providing them with meaningful volunteer opportunities. RSVP has served Columbus County since 1973, providing 62,000 hours of service on an annual basis. These men and women volunteer in a number public and private nonprofit agencies and organizations, including civic clubs. Volunteers work in a variety of areas, including childcare, crime prevention, literacy, nutrition, and health care. They provide food and clothes to the needy, teach children to read, deliver hot meals to seniors, and visit hospital and rest home patients. The volunteers determine how much time to give and to which assignments.

P.O. Box 336
Bolton, North Carolina 28423
(910) 655-8708
Description of Services: Designed to provide job training for economically disadvantaged American Indians, the Commission provides high school dropouts, elderly, and disabled individuals with job placements in not-for-profit agencies. Participants work 25 hours per week at the assigned job sites and attend classes at a local community college at least 15 hours per week. Job search assistance, placement, and referrals are provided to interested participants. College financial assistance programs are available to eligible participants.

North Carolina (Columbus County) Cooperative Extension Service
P.O. Box 569
45 Government Complex Road, Suite A
Whiteville, North Carolina 28472
(910) 640-6605
(910) 642-6315 – Fax
www.ncces.ncsu.edu/
Description of Services: The North Carolina Cooperative Extension Service (NCCES) helps people improve the quality of their lives by providing research-based information and informal educational opportunities focused on issues and needs.

The range of topics Extension addresses includes:
4-H Youth Development -- develops important life skills in youth that build character and assist them in making career choices that strengthen citizenship and leadership. At-risk youth participate in school retention and enrichment programs. Youth learn science, math, and social skills through hands-on projects and activities.
Agriculture -- research and educational programs assist individuals to learn new ways to produce income through alternative enterprises, improved marketing strategies and management skills and help farmers and ranchers improve
productivity through resource management, controlling crop pests, soil testing, livestock production practices, rangeland management and marketing. Urban agriculture programs support residents and communities with urban forestry, home and public landscape, pest and disease control, lawn waste management, farmers’ markets, and developing skilled master gardeners. Community and Economic Development -- assists local governments to investigate and create viable options for economic and community development such as improved job creation and retention, small and medium sized business development, effective and coordinated homeland defense and emergency response, solid waste disposal, tourism development, workforce education, and land use planning.

Family and Consumer Sciences -- helps families and communities become more resilient and healthy by teaching nutrition, obesity prevention, food preparation skills, positive child care, family communication, financial management, and health care strategies.

Leadership Development -- trains extension professionals and volunteers to deliver programs in gardening, health and safety, family and consumer issues, 4-H youth development, and prepares citizens to serve in leadership roles in the community.

Natural Resources -- teaches landowners and homeowners how to use natural resources more wisely and protect the environment with educational programs in water quality and water conservation, timber management, composting, and recycling.

106 West Smith St.
Whiteville, North Carolina 28472
(910) 641-3095
(800) 982-4041 – Toll Free

Description of Services: Guardians ad Litem and attorney advocates are appointed by Juvenile/District Court to represent the interests of children who are allegedly being abused or neglected. Guardians ad Litem and the attorneys represent the children for the duration of the court proceedings. Guardians ad Litem report objectively to the court at each juvenile hearing to summarize and prioritize each child’s need. The Guardians ad Litem and the attorneys work together to ensure quality representation for children throughout the justice system. Additionally, Guardians ad Litem work with other community agencies to locate and develop resources for children.

Legal Aid of North Carolina, Inc.
(910) 763-6207

Description of Services: This agency assists with legal services for Brunswick, Columbus, New Hanover, and Pender counties (also serves Bladen, Duplin, and Onslow counties).
Description of Services: This agency provides intake, probation, and post-release supervision services for delinquent and undisciplined juveniles. This agency is also responsible for post/pre-court services, psychological testing, substance abuse testing/treatment, school counselors for DJJ youth, parenting class, peer circle, and home arrest.
